**Current Loyalty to the Insurgency:** Neutral but will work if paid enough

**Description:** Alison is rather talkative and doesn't find it hard to extract information through non violent means while also being very ruthless in extracting information from less willing subjects

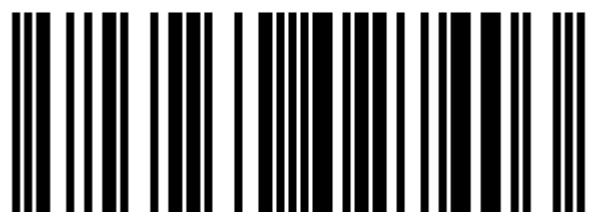

. The subject seems to have psychopathic tendencies this being shown within his brief time in chechnya, working for the Chechen Republic of Ichkeria in this war he was used as a boogeyman to hunt down Russian High ranking leaders as well as performing sniper support for various high risk battles.

In one job working for MC&D Alison was not paid in cash but rather in various anomalous [REDACTED] which Alison was more than happy to accept due to his previous line of work as a [REDACTED] in which he gained his codename 'Texas' from.

In combat Alison is efficient and cunning, employing various tactics; setting up ambushes, evading detection, misdirection and distractions. While being good with tactics their skills with rifles and SMGs are average at best.

In addition to their work with MC&D Alison has often worked with the foundation but holds no loyalty to them or their ideas, the same relationship is observed with the UNGOC. This is a problem as long term employment towards the insurgency is almost impossible due to this nomad lifestyle.

Addendum: The use of Class F amnestics is currently in discussion but at the current moment is to be denied due to the results of a possibly failed brainwashing.
