- Did PyMuPDF accurately extract all the text?

To check all the data was correctly extracted, I redrew the extracted boundary boxes on the PDF pages as visual overlays.

- Were there issues with certain areas or layouts (tables, columns)?

All the data came through correctly.

- What challenges or observations did you encounter?

None as such

- Based on your experience, what improvements or adjustments would you consider for the next step when extracting specific fields (such as the Manufacturing Date and Expiration Date)?

Nothing as of now.
