WRPS uses Blocksi as its content filtering program. This program will keep students safe at school and home when using their school-issued devices and accounts. As a parent, you have the ability to set additional restrictions when your student is using the district issued Chromebook outside of the school day. As a partner in your child's education, we feel it is of value to give you access to the Blocksi manager. In the parent dashboard, you'll have a real-time view of your child's activity on their school device or account. In addition to these features, you will be able to block specific categories such as social media and gaming on your child's school device or account when they are logged in at home. Blocksi also has the capability to pause the internet at home. You will also be notified of any flagged activities pointing to self-harm or bullying related to your child.

You can access the dashboard via an app available for Android and iOS devices. You can access the web-based version by navigating to https://blocksi.net/parent-hub/.

If you receive an email or error indicating your email address is not found, verify in your Skyward account that you are using the correct email address. If you are unable to verify your email address, please reach out to your child's school secretary to make sure you have a valid email address on file. Other questions can be directed to Phil Bickelhaupt, Director of Technology, at phillip.bickelhaupt@wrps.net.

You can access additional Blocksi Parent Resources here to assist you in using the Blocksi Parent Dashboard and helping you manage your child's chromebook.
