Find Difference

- a.
7. At the bottom left of the window, click the “Compare and merge” button
8. At the bottom middle of the window it'll say “Select a valid section to merge”, click Next
9. When you get to something with orange on the left window and green (or nothing) on the right window, click the Merge button with the orange arrow. If there's no orange on the left and there's only green on the right, just click next.

10. The orange in the left window should now be added to the right window.
11. Repeat steps 8-11 until all the orange sections are merged.
12. Now at the bottom right of the window is the “Changed Text” window. Ctrl+a to select everything in this little window, ctrl+c to copy it.
