BIOGRAPHY.

Talula Pyrope is a teal blooded troll born on Alternia, having survived the trials all Alternian grubs must face. With her might and power, she'd be granted a very fearsome and powerful lusus, Pyralspite. A white, colossal dragon whose eyes alone can blind someone. Because of this, at a young age, Talula would have crafted a pair of glasses to shield her eyes from her Pyralspite's gaze, mimicking them after the piercing eyes the dragon themselves had. This accessory would soon earn her the moniker 'Redglare', as she rarely took them off. Both as a means of protection from her lusus, but as while to hide any ability to read her so easily. After all, she is a studying lawyer.

Talula would begin her studies at an extremely young age, and would spend nearly all her time reading and studying. Thus, she never socialized or made any friends. Many were even put off by her demeanor, as she held herself focused and serious as she worked. However, to anyone who would get to know the troll, they'd find a soft, humorous center within her. A gift to those who she saw was worthy.

Due to her endless work, she'd rise in the ranks rather quickly, thus earning the attention of the higher bloods. When she graduated, she was immediately put on The Grand Highblood's court, and soon she'd become his most respected and important knight on his board. Earning his praise and trust, Talula wouldn't be as monitored as strictly.

This was in her plan since the very start. As all of Talula's hard studying wasn't just to get close and earn a comfort spot, for she also would make note and learn exploitative loop holes in their law to save the poor, innocent low blooded trolls from being executed for crimes they were not guilty of. For The Neophyte, Redglare, was a troll that sought for true, equal justice.

So, it would be no surprise that Talula would be a loyal follower of The Signless, the rebel mutant blood who was preaching for equality and the destruction of the blood caste system. She was a follower of him since the beginning, before she even graduated. However, he never knew of her, or rather, they never spoken. That is, until she earned her place, and would confront him and offer him and the rebellion some protection. As Talula would be aware of the high blood's plans and knowledge on the rebellion, she can hand them the information over to keep them out of their radar.

Talula held a high respect, loyalty, and honor toward The Signless ... But, as she feared, when she got close, she may get too close. It didn't take very long for the law enforcer to fall in love with the rebel. However, his love was saved only for one, his loyal Disciple. Talula didn't hold any ill feelings toward her, she did have respect for the olive blood as she helped document everything. Talula still would try and keep their interactions small and limited, feeling awkward and uncomfortable when within her company. Although, they would end up sharing deep and long conversations of The Signless's ideals and preachings.

One day, Talula would be sent on a mission to capture Marquise Spinnerette Mindfang and take her to trial. While her mission was a success, having blinded the pirate's eye, taken her arm, and had Pyralspite consume their lusus ... Her victory would be short lived. As once she returned, she'd learn that, now without her information, The Signless and his following would have been finally captured. All of them having been culled, and The Signless being publicly tortured till his death.

CANON DIVERGENCY.

- Redglare's real name is TALULA. The only person, in regards to canon muses, who knows of this is Signless, The Grand Highblood and The Condesce.
- While this isn't a canon divergency, it is a popular fanon so I will address it. Redglare IS NOT BLIND.
- Redglare was an active follower of The Signless during his time being alive. She was apart of one of his more loyal and devoted followers, but had to be discreet considering her position.
- Redglare is now in the dream bubbles AFTER the session was won and a new universe was created.

While emotionally destroyed and weighing the guilt heavy on her shoulders, Talula coldly buried herself into her work. Getting Mindfang ready for her trial and inevitable execution, she'd numb herself out entirely.

The trial would come to an execution, however, not the one anyone was expecting. As Mindfang took control of the rust blood jury with her psychic abilities, causing them to rush and attack her, taking her to the noose and lynching her.

The demise of one of Signless's last followers, murdered at the hands of the people she had been trying to save.

Talula would eventually find herself returning, although not alive, but not entirely dead, either. As she awakes in a dreamlike state, whirls of memories and other company of those long dead would be found. Somehow resurrected back inside what she would soon learn is called 'dream bubbles'.

Possibly the result of the creation of a new universe, perhaps.
