

*Governor Blockdenied and Congressman Cold B. Coffee share a stage in Louisville's Iroquois Park as the former prepares to speak on foreign policy and give his endorsement to the Hurricane/Cold 2019 campaign for the presidency.*

*Cold comes to the podium first with typical Dixie swagger, prepping the sizable crowd for the big event.*

---

Good evening y'all! Are you ready to hear a great speech?

*The crowd cheers approvingly. Those who remembered to grab a campaign sign at the gate wave them enthusiastically.*

That's great! Because I am too!

I believe that the guest speaker tonight needs no introduction, but I'm going to give him one anyways. Everyone please give a warm welcome to former Governor Blockdenied!

*As Cold steps back from the microphone, Governor Blockdenied approaches with a wave of his arm and a big grin on his face. He skips the formalities and goes straight into his speech.*

There are two emerging threats out there... can you guess what they are? I'll give you a hint: both are red and represent something evil.

*The crowd murmurs questioningly, wondering what the answer might be.*

It's China and the GOP!

*The crowd begins to laugh, but the chuckles are quickly drowned out by the booing.*

I know, I know, I hate it too.

Why does a party in this country who says they support Americans want to cuddle up with China? China, which takes away our jobs, plays around with their currency to harm our economy, places tariffs on us whenever they feel like it, and tortures Uighur Muslims. Do you think we should be supporting a party like this?

*The crowd shouts a resounding "No!" at the absurdity of the question.*

This is why we need a real leader in the White House who will continue to fight for true Americans like you, and who will protect our American interests abroad! I fully support

Mr. Hurricane in his bid to become the next President of the United States, because his interests are those of everyday Americans just like you!

*The crowd cheers because they like to hear that a politician has the same interests that they do.*

The GOP supported a bill that promotes the dangerous acts of China and essentially gives them a pat on the back for torturing Uighur Muslims, violating international law, suppressing Hong Kong citizens, and even releasing a “morality guideline”. Chinese President Xi Jinping has been busy centralizing power and cementing himself as China’s main man above all else. Xi’s political philosophies — enshrined in the constitution as “Xi Jinping Thought” in 2017 — are the driving force behind the guidelines released recently.

At face value the guidelines appear to be good, however they hide the autocratic and authoritarian policy President Xi is placing on China’s own citizens. One such policy is a clause where citizens must have faith in President Xi. This effectively destroys the free will of the people, something that we in America cannot and will not abide. We cannot allow this to be mirrored at the highest levels of this great nation as well.

If Hurricane isn’t elected, and the GOP takes power, we’re gonna be set back decades.

Not only will they implement regressive policies overturning all of the progress we’ve made, but we’re going to lose our strong foothold on the world stage as well. With Hurricane as President of this great nation, he will make sure that countries like Pakistan, India, Venezuela, China and Russia are set in their place. We will be able to ensure that they impose no threat to us.

No more will we have to deal with these nations and others trying to boss us around; with Hurricane as President we will stay on top globally, which will ensure the safety of our citizens.

Ever more so now we must keep aware of other countries' actions and the terror groups that reside in them, for example with Boko Haram. I was confident when their resurgence was coming that it would be taken care of, and the GuiltyAir administration did an amazing job. This is one example that shows what Hurricane is capable of, I believe that with his administration at the helm we have nothing to fear.

If we allow ourselves to be unaware of changes happening across the globe, it will allow terror groups and countries engaging in heinous actions to proceed unchecked. A White House with the GOP in residence will cause our country to risk being in serious danger from threats abroad - instead of keeping our country great, the GOP will end up harming it instead.

That is why you MUST vote for Hurricane this election—he's going to be the President who will stand up to our enemies and make this great country even greater!

Thank you, and good night!

---

*The crowd cheers and shouts "Hurricane! Hurricane!" as event staff handout Hurricane/Cold 2019 merch. The two speakers leave the stage with a wave as Bruce Springsteen's Thunder Road begins blaring from the speakers.*
