

Hello world

I am wondering if anyone needs hired help. I am a homeschooler who takes great pride in working with spreadsheets. I have had experience and take enjoyment updating, editing, and creating spreadsheets, and I love the efficiency and ease that they bring to any project. I am currently studying ballet, and hope to travel, and this type of job would allow me to finance these pursuits. I am writing to ask you if you know of any person or company that may be in need of my skills. Please feel free to circulate this to anyone who might be interested, and let me know of any leads I should pursue.

I have experience working with people and running projects entirely online. My current online responsibilities include administration for UGC (<http://www.ugcleague.com/>), a competitive 5video game league which involves managing, scheduling, forum administration, and solving disputes for 52 teams with a total of over 500 players. Also I was given money to build and host two servers for <http://twentymin.com/>, a global Minecraft community. I am also the leader of a competitive UGC TF2 team which involves scheduling several matches, practice matches, and strategy meetings a week with around twenty people.

I am eager for the opportunity to bring my time, experience, and passion to a worthy project, and I appreciate your support for this endeavor.

Thank you,
Gregorian P. Hawke
