Debugging input device issues

Getting info about connected devices

- download http://notyetthere.org/data/lsinput
- copy it to the phone
    - adb push lsinput /home/phablet/
- chmod +x it, so you can execute it
    - adb shell chmod +x lsinput
- run it
    - adb shell lsinput

Please run lsinput once without having the input device in question connected and once with it. Include both logs in the report.
