Sean Forester- Hoare

Report on conversation 92723 with GBCI Nurse Nicole ( not sure of name)

I had tried twice to talk with GBCI HSU staff earlier in the day. I was told to call back at certain time , which I did unsuccessfully and concluded they were just trying to put me off. Then At around 7:30pm this nurse called- I think her name was Nicole, but am not sure- did not write it down. She did not know Sean and had not work that unit much, but was forth coming in interpreting his file records. I also could only leave a message with Security Director Kind.. . At most, in all previous attempts With other prisoners, I could only get as far as his secretary-that seems to be the policy and then I hear nothing back so I write.

This is transcription of part of his letter on health care- the rest was devoted to the assault:

He is on hunger strike trying to get health care- has not seen an outside director since 2018 and they are refuting all diagnoses: myrsa, mental illness and a leg broken by staff which set itself

“-HSU canceled the medical pads I have to cleaning anal Fissures so the MRSA is way worse- ( can't read)????then to clean a cell? ( possibly CR accusing him for using cleaning stuff to clean cell) But I never even got a ticket- for I Didn't Do It- she just canceled it and lied this was why it was the only Medication out of the 30 I need I was getting. It's retaliation for all the hunger strike. I'm really skinny now . They should get a court order to feed me. I've nothing left.  
Due to this all 8-12-23 I seriously tried to kill myself three times in one night. I hung myself and slit my wrist twice while on observation. I don't do this, I'm not wanting to go on apps, I won't self harm. it was a real suicide attempt .”

She verified that he had all his meds canceled- she said because they were dangerous if he is not eating and kept repeating the same phrase- obviously what was in chart. She said he can deny using the cleaning pads for his cell but his cell is “monitored”and they know the truth. I ranted how important it is that he keep clean with his myrsa. She said “he gets soap” to which I talked about the tiny bars they give as totally inadequate. ( RHU prisoners are not allowed to get the union supply hygiene or order from canteen- the soaps are hotel sample size).

Then I asked her about his general health- she said he is fine, ate his his meal tonight and drinks ensure and gets eletrolytes- I said then he is eating? And she said- “on and off”-”so he should-be getting his meds right? I asked what his weight loss was. She could only find weight between june and july- loss of “one kilo.” I do not think he was on hunger strike way back then . She thought he may have refused being weighed.

After finishing, I wondered : are there cameras in the cell? What does “Being monitored” mean? is there a running video in his cell? And about the cleaning his cell- all prisoners complain of the lack of cleaning supplies they are given and the filth in the cells- with Mrysa- cleanliness is the main component of not getting sicker/healing. Will write Sean via TB web and get his take on all this.
