

# Reliable Mass Production of the Cleanest, Safest Water from the Air

## *Already Improving and Saving Lives in 4 Continents*

By 2025, two thirds of the world will face drinking shortages, and many populations already struggle with access to clean water.

But there's something we can do.

Watergen – **a recognized global leader that has already been trusted by governments, remote communities, oil rigs and first respondents in 4 continents** – has developed a patented propriety GENius technology that uses the humidity in the air to create clean and fresh drinking water.

**Countless lives have already been improved, and even saved**, thanks to the safest, cleanest and freshest-tasting water Watergen's generators produce, and it's just the beginning. There are still billions of lives to save around the world.

## The Most Energy-Efficient, Cost-Effective Way to Make AWG Consistently Accessible to Any Community Size

**Watergen's atmospheric water generator solutions have already been implemented in a wide range of countries, and in a wide range of air and humidity conditions, across Asia** (including India, Vietnam and the Middle East), **Latin America** (from Mexico to Brazil), **Africa** (specifically, South Africa) **and North America** (across the United States).

Among others, Watergen has served **remote communities, natural disasters** (like the 2018 California fires), **oil rigs** and **temporary structures**.

Whether you serve cities, villages, commercial centers, schools, hospitals, offices, residential buildings or private consumers (like families), Watergen has the technology, capability and experience to ensure they can **access reliable, safe and actually tasty water directly from nature on a consistent basis**.

## Choose the AWG Size You Need

Watergen's atmospheric water generators come in multiple sizes to meet a variety of community sizes and needs.

<b>Large Scale AWG</b> Get 5,000 liters of clean water a day – perfect for villages, off-grid settlements and factories. Units can be integrated into AWS farms.	<b>Gen-350</b> Give your school, hospital, commercial center or residential building its very own on-site renewable water source of 600/900 clean and tasty liters of water a day.
<b>Emergency Response Vehicle</b> Get an ERV that securely transports 600-liter-capacity safe AWG units through any terrain, and save more lives.	<b>Genny</b> Provide consumers with the freshest 25 liters (approx. X glasses) of water a day they've ever tasted, whether they're at home or at the office.

## What Your Community, Team or Consumers Get with Every Generator:

- ⇒ **The world's most energy-efficient atmospheric water generator (in terms of efficiency-cost-size-ration)**, also known as the GENius Patented technology.
- ⇒ **Suprememe water quality:** The combination of aggressive air filtration and unique GENius structure facilitates the generation of an almost pure H<sub>2</sub>O. In addition, as a disinfection unit, we provide a UV system, which can treat up to 7 types of bacteria including, Pseudomonas, Aeruginosa or Legionella.
- ⇒ **Clean water even in high air pollution conditions**, with iur unique and robust air ltration methodology.
- ⇒ **Easily move the (Gen-350) generators from place to place** using simple trucks.
- ⇒ **No more complicated logistics when delivering water to remote areas and emergency situations.**

- ⇒ **Plug and drink solution:** No infrastructure or piping needed. Get immediate water generation. Requires only a power source to start operations.
- ⇒ **Not dependent on ground water,** so it can be safely operated in areas with high contamination of Arsenic and Florid.
- ⇒ **Army standards compliance** to certain products.
- ⇒ **Environmentally friendly:** Reduces plastic wastage and carbon footprint.
- ⇒ **Great customer service:** The technology is easy to use, but if you need support, the team has your back.

## The Multidisciplinary Team that Turned Fiction into Reality

Since its foundation in 2009, Watergen has gathered together a growing multidisciplinary, award winning team of experts – many of them with **decades of experience in water, development, engineering and healthcare** – created a powerful research and development center to build its **patented technology**, and partnered with leading universities to make sure that every living person gets to exercise her or his human right to drink clean and safe water.

Meet Watergen's leadership team:

### **DR. MICHAEL MIRILASHVILI, PRESIDENT**

The visionary behind Watergen's mission to provide drinking water to every corner of the globe, Dr. Mirilashvili has been a global business leader for over three decades. His corporate group includes high tech companies, commercial and real estate developers, and energy and infrastructure projects. He is a strong advocate of human rights and serves as president of the Euro-Asian Congress and vice president of the World Jewish Congress.
