Deer Season Set, Apply Online May 7, 2025 North Dakota Game and Fish

North Dakota's 2025 deer season is set, with 42,300 licenses available to hunters, down 7,800 from last year.

In addition, muzzleloader licenses decreased by 150 and restricted youth antlered mule deer licenses remained the same.

Casey Anderson, North Dakota Game and Fish Department wildlife division chief, said population, harvest and survey data indicate the state's deer population is stable to decreasing throughout the state.

"The state's deer population continues to recover from the 2021 EHD outbreak and the severe winter of 2022-23, which limited population growth despite reduced gun licenses during 2023 and 2024 hunting seasons," Anderson said. "Modest license allocations are intended to maintain hunting opportunities while encouraging population growth in the state."

High-quality deer habitat is not abundant, which has limited the potential for population recovery. If CRP contracts continue to expire, Anderson said 85% of the once 3.4 million acres present in 2007 will be lost by 2026.

The spring mule deer survey showed western North Dakota's population is 14% lower than last year despite a reduced harvest and consecutive mild winters.

ND Outdoors: Deer season preview October 25, 2025 North Dakota, KFYR-TV ... Whitetail deer numbers are still down across the state. "We're still coming back from a severe EHD outbreak that we had a few years ago. The population is rebounding slowly. And then the eastern part of the state, we're still down, but we had that severe winter a few years ago ... it's really an issue with lack of habitat in the eastern portion of the state," [Bill Haase, North Dakota Game and Fish wildlife division chief] "The mule deer in the badlands are fairly stable to slightly lower than they've been in the past, I would say. But outside those traditional areas of the badlands, mule deer are doing pretty well." ...

<u>Decline in deer gun tags remains a hot topic among North Dakota hunters</u> October 31, 2025 North Dakota, InForum

... North Dakota Game and Fish Department offered 42,300 licenses for the 2025 deer gun season ... more than 70,000 people applied for a deer gun lottery license this year,

in addition to more than 12,000 gratis applicants ... Habitat drives deer numbers – and ultimately, deer licenses – in North Dakota...

No mystery why there's fewer deer and fewer hunting licenses in ND. The habitat is gone. November 4, 2025 North Dakota, InForum

... The modern boom of North Dakota wildlife happened in the early 2000s when the federal Conservation Reserve Program — which paid farmers to keep marginally productive land out of production. That's 3.4 million acres of grass and temporary wetlands and scrubby stuff in which deer and pheasants thrive... Now the state's CRP land is down 75% or more, to less than a million acres ...
