Design Meeting

Rosa made it.

**It was very nice to meet you, Rosa. We are very lucky to work with you on things for Grin.*

I wish that I could keep up with the number of things Rosa said she was doing in China for Grin. Lots of testing. Lots of listening, Outreach and effort towards helping people understand Grin. It also helps that she is a Pro.

Design next steps.

Focus on all 713 before extending outwardly. That means making it great.

- **Rosa** is focusing on creating specifically for the Chinese market.
 - She is using feedback from testing 713, and Christoph's design.
- We reached out to Linear Wallet and we'll keep in contact with them.
- **Christoph's** design is being used by Iron Belly Wallet. I could be getting that wrong, but somebody is using it and that is awesome. *Hats off to Christoph.*
- **Noah** reached out to Gavin from Ideo. He has a call with him so we'll learn more later.
- **Numecca** is designing an information layer.
- **Ernest** is working on communications with Numecca and others
- **Nijinot and Noah** leading us, which is nice. Thank you.
- **MF Grin** is just glad to be here.

Numecca next steps

I really wanted to bring people here fast. I realize that was a bad idea. It's too early.

I would like you to consider giving us a "Creative" category in the forum.

We need a category for our ideas and discussion. That sandbox will get the creative engine of this community going. We have the engineering mind going. Let's activate the other side.

Give the community an invitation to share their thoughts and ideas. "Uncategorized" is not a place for creation.

Thank you for considering it.

Communications

Nobody understands Grin.

People see Grin Coin. They don't see Grin.

We talked about the level of misunderstanding and confusion that people have about Grin. In all of the coverage that Grin has, the most interesting things are nowhere to be found. [Grin has an incredible story](#) to tell.

Earnest and I will work on describing Grin for people in way that communicates it effectively. We talked about [setting parameters](#), which I think Nijinot took a stab at. While our first interest may not be trading Grin, that matters to other people, so our communication should be mindful of them. None of us would ever encourage speculation. But I wouldn't discourage it either. There is an ethical boundary that we are conscious of. There was much discussion on how we should balance this dialogue. We will figure it out.

Good chat.
