

*Agenda for first official YC meeting!*

Sunday, January 13th

3:00-4:30 pm

**Add your own stuff on here! We are making this community for YOU!**

- Meet & Greet
- What we're trying to do & why, where we are in the process, who else is involved
- How do we move forward? What ways can we best work together?
  - Open Quest-board
  - Define working groups (Content, Organizational, Development, Ideas, Outreach)
  - What is your ideal role in all this?
  - Designate point-people in working groups.
- Voting. How should it work? How should actions be taken?
  - "It's important to distinguish "asking permission" from "getting necessary input" and "keeping people appropriately informed"." - Joel
  - Mimic OWS style in person? Taking stack, hand signals. Etc.
- Meetup event planning
  - "I've suggested it as a one-day event. We have more 'Serious Discussion' than we would be able to fit in one day, but the concept is so new I don't think the audience would be willing to sit through even that much. We need to intersperse Serious Content with fun and socializing, and the event should combine the spirits of a relaxacon and a hard-science symposium. 'How?' is a question that needs more brainstorming. I've suggested a feast and a music event. Suggestions are not a plan. We should also start exploring exactly what should go into that Serious Discussion. " -Joel
- Communications/Outreach strategy
  - "...if we have a site to direct people to, and an organized and coordinated social media campaign to direct them to it, and it leads to a belief system they're willing to believe in, I think we can get enough action out of it to have a strong positive effect." - Joel
    - Create outline/action plan to accomplish this
- 2B, or not 2B? Is this location/vibe good for future meetups?? Are there other suggestions on free spots?
- Action items for next time!
- Six figure salaries for consultants? :-)
