

Hyrax Interest Group Meeting - 2022-04-13

Community Notes

Notetaker:

- Attendees
 - Julie Hardesty (Indiana University)
 - Heather Greer Klein (Samvera)
 - E. Lynette Rayle (Cornell)
 - Rebekah Kati (UNC-Chapel Hill)
- Hyrax Maintenance Working Group update - Julie Hardesty
 - Hyrax 3.4.1 released
 - Emory University participated in most recent sprint
 - Call for Blacklight 7/Bootstrap 4 upgrade help to reach Rails 6 by June 1
 - This work is to help us reach Rails 6. We need to get this done before the end of life for our current version. We will be on a version of Rails that doesn't have security updates. Really need volunteers to make this happen.
 - Getting past the failing test will help us, and after that it will not be as much work to implement the Rails 6 upgrade.
 - If you are interested these are up for grabs, HMWG sprint starts next week if you can join it
<https://github.com/samvera/hyrax/issues?q=is%3Aopen+is%3Aissue+label%3A%22bootstrap+4+upgrade+dev+congress%22>
 - Branch: <https://github.com/samvera/hyrax/tree/bl7bootstrap4>
 - Has anyone started the work of changing the style tags yet? Not certain. Will cause it to look unstyled in certain places. May have left off with updates to JQuery.
 - This is also on the May dev congress topic list
 - Can still make a maintenance pledge for May-Aug!
- Topics and Projects
 - Hyrax-Valkyriization sprint results
 - Lynette led sprint in March, using the feature testing spreadsheet on nurax-pg. Running the feature tests to see where they break. 40+ PRs merged. A few places blocked, but it is closer!!
 - See last tab for latest information about tests:
 Nurax-pg_Hyrax_QA_Testing.xlsx
 - Getting through the blockers will allow for further testing
 - Hyrax Tech Lead and PO search updates
 - We are still searching! Funding offer still available. Contact Julie for information. Would like to get started with the next PO to get them up to speed.
 - Hyku News

- Not a lot of news, a ton of work on Bulktrax features and optimizations. Working on splitting PDFs and component images, just push a chart update for Hyrax that allows for a load balancer. In process to allow cantaloupe to be used. Ubiquity dev team unclear who is working in the Hyku space.

- Questions?
- Next meeting: Wednesday, May 11, 11:30am Eastern
