ABSTRACT

An abstract must accompany each manuscript; This abstract must be completely consistent on its own (eg, without numbers, tables, equations or reference citation), not exceeding 250 words and written as a paragraph. The abstract should include research background, objectives, methodology, and findings.

Keywords: Keywords are written in English, 3–5 keywords or phrases

INTRODUCTION

The introductory section mainly contains: (1) situation analysis; (2) partner problems; (3) the solutions offered; and (4) target output. The situation analysis depends on the target community. The analysis can be in the form of a description of all the problems faced by the partner community in terms of social, cultural, religious, health, service quality or community life. It can also be in the form of potential and business opportunities for partner communities from the aspects of resources, production and business management. Referring to the situation analysis, determine priority issues for partner communities that are specific, concrete, and really are priority issues for partner communities.

Describe the science and technology/goods/services offered to solve partner problems and work procedures to support the realization of the solutions offered. Describe the activity that shows steps to solve the problem and describe how the partners participated in the implementation of the activity.

Describe the type of output produced in accordance with the plan in terms of production, management, or other outputs in the form of products/goods, services and other outputs. The template for this article format was created in MS Word 2010, Body text using the font: Times New Roman 12, regular, spaced 1. The introductory section is about 2-3 pages long. The writing of this introductory section is without subtitles.

METHOD

Basically this section describes the implementation and service methods. The description of the implementation of the activity includes the location, time, participant background, and the number of participants. Meanwhile, the description of the activity method includes the methods and materials presented. Choose one or a combination of several activity methods, including: (1) training / training related to goods and services, diffusion of science and technology, substitution of science and technology (renewable science and technology), or simulation of science and technology; (2) Continuous education;

(3) awareness / increased understanding of a problem; (4) consultation / mentoring / mediation. It is best to avoid organizing the writing into "sub-headings" in this section.

However, if it cannot be avoided, the method of writing can be seen in the "Results and Discussion" section.

RESULT AND DISCUSSION

Relevant documentation with a focus on community empowerment activities. The minimum resolution of photos and images is 300 dpi with JPEG extensions (.jpg). Use image processing software to check dpi.

Results must be presented correctly and accompanied by an explanation without reference to the literature. Original and important findings must be stated. Results must be illustrated with numbers or tables if necessary, but must be kept to a minimum. Detailed discussion, speculation, and interpretation of data are not included in the results, but in the discussion section.

1. Tables

Tables are made with column width either 80 mm or 170 mm, in single spacing. Use only horizontal lines for borders. For example

Table 1. The Mean of LDL-cholesterol

Group	Mean±SD, mg/dl	
	Pre-test	Post-test
Control	50±6 ^a	24.23±4 ^a
Non-exercise	51±4 ^a	97.99±4 ^b
Exercise	54±6 ^a	29.40±2 ^a
p	0.013	< 0.001

^{a,b} Significant ($p > 0.05$).

Source:

2. Graphs

Graphs created with Microsoft Excel should also be sent in their original Excel file. Present graphs in 2D (not 3D), without shadows or other effects, and without gridlines.

Figure 1. LDL level pre-test and post-test. Different notation shows significant differences ($p < 0.05$). K0: control; K-: negative; EBF1: extract 1; EBF 2: extract 2

Source:

3. Photos and figures

Relevant documentation with a focus on community empowerment activities. The minimum resolution of photos and images is 300 dpi with JPEG extensions (.jpg). Use image-processing software to check dpi.

Figure 2. The appearance of Desa Bondowoso. (a) Majority of house type owned by the community. (b) Grass appearance of the community field.

The discussion must interpret the findings expressed in the results obtained with the background of existing knowledge (not repeat the result). The discussion must highlight what's new. Each assumption must be clearly stated. Linkages between results and the context of the target population and possible generalizations to other populations. The advantages and disadvantages of community empowerment activities that are carried out with the conditions of the surrounding community.

CONCLUSION

Provide conclusions on the level of achievement of targets for community empowerment activities. Providing conformity to methods of community empowerment with problems, needs, and challenges that exist in the area of community empowerment activities. Give conclusions about the impact and benefits of community empowerment activities. Provide advice for further community empowerment.

REFERENCES

References are written based on APA 6th edition style. References are listed in numerical order, and in the same order as quoted in the text. The References only lists references that you have quoted in the text. The author is responsible for the accuracy and completeness of the references. Consistent with reference styles throughout the article. Highly recommend to use Mendeley.
