Introduction

Alien@ Gold ETF 2050 is a decentralized ecosystem offering tokenized gold investments, NFTs, staking, and governance, aiming to bridge traditional finance and gold digital assets for a sustainable future.

Vision & Mission

Vision: To establish Alien@ as the most liquid, adaptable, and widely accepted digital currency across decentralized and institutional ecosystems.

Mission: To deliver an accessible, inflation-adaptive token economy that empowers individuals, communities, and businesses worldwide.

Key Token Parameters

Token Name	Alien@
Ticker	Alien
Blockchain	BNB Smart Chain (BEP-20)
Standard	BEP-20
Decimals	18
Total Supply	Mint function renounced on-chain
Opening Price	Determined by market
Alien@ Market Cap	listed on Gecko Terminal Market Cap Live
Circulating Supply	900,000,000,010,191,000,000,000,000

Tokenomics & Allocation

Alien@ employs a deflationary token burn strategy and controlled, demand-driven issuance to enhance value for holders

Category	Percentage
Liquidity Pool (Dex liquidity and Trading Support)	40%
Community Incentive (Community rewards and airdrops)	20%
Reward Program (Staking rewards and yield farming)	20%
Strategic Partnerships (Ecosystems Growth and Collaborations)	10%
Team and Advisors	10%

Utility & Use Cases & Payments

Real-World Asset Settlement Protocol

Purpose: Enable \$ALIEN holders to settle invoices for goods and services in fiat currency, using \$ALIEN as the funding asset.

Mechanism:

1. **Valuation Standard:** All payments are calculated at live market spot price of \$ALIEN at the point of execution. The invoice value in local fiat currency (e.g., GBP, USD, EUR) determines the exact \$ALIEN amount required. There is no fixed multiplier or discounted rate.

2. Settlement Flow:

- Buyer authorises payment in \$ALIEN via designated liquidity venue.
- \$ALIEN is converted to fiat in real-time through regulated third-party payment providers.
- Merchant receives 100% of invoice value in local fiat via standard bank transfer.
- Merchant holds zero cryptocurrency exposure and requires no wallet infrastructure.

3. **Regulatory Compliance:** Settlement occurs exclusively through licensed payment service providers regulated in the merchant's jurisdiction. Example: UK FCA-regulated crypto-to-fiat off-ramps for GBP settlement. All AML/KYC and source-of-funds requirements are handled by the regulated provider.

4. **Exchange Venues:** Primary liquidity sourced from \$ALIEN listed exchanges, including Pionex SG HQ and UK-listed venues. Spot price is determined by volume-weighted average across listed venues at execution time.

5. **Issuer Payments:** When the issuer is the payer, source of funds is declared as "token issuer treasury". Same valuation and settlement rules apply: live spot price = 100% of fiat invoice.

Merchant Benefit: Receives full fiat invoice value with no price volatility, custody, or compliance burden beyond standard bank transfer receipt. Gains first-mover marketing rights as "\$ALIEN-enabled merchant".

Buyer Benefit: Settles real-world invoices directly from \$ALIEN holdings without prior conversion to fiat.

Disclaimer:

Settlement is executed via third-party FCA-regulated payment providers and associated exchange venues. While the merchant receives 100% of invoice value in GBP, the underlying \$ALIEN-to-fiat conversion may be subject to standard exchange liquidity conditions and security hold periods. Timing of merchant receipt follows the payment provider's normal bank transfer SLA once conversion completes. We are not liable for delays arising from exchange-level liquidity constraints, however execution will not proceed until sufficient liquidity is confirmed. Please refer to the provider's terms for fund availability policies.

Stablecoin Features

- **Asset-Backed:** (1 Alien© = 1 Gold ETF 2050), (TradePlus Shariah Gold Tracker)
- **Stability Mechanism:** Algorithmic burns and DAO governance to maintain value
- **Use Cases:** Stable store of value, cross-border payments

Payments: Low-fee cross-border transactions.

Technical Architecture

BEP-20 smart contracts with mint and burn functions governed by Alien@

DAO. Oracles for market data to adjust issuance and burns.

Cross-chain bridge support planned for Ethereum, Polygon, and Solana.

Future scope includes a custom Layer-1 for ultra-high scalability.

Governance (DAO)

DAO governs protocol upgrades, treasury use, and ecosystem expansion.

Price exposure only, no voting right.

Safeguards: Multisig treasury, and transparent on-chain records.

Next Of Kin For Holdings

Legal

Nomination of Next of Kin

- ALIEN token holders can nominate a next of kin to manage their tokens in case of incapacity or passing.
- To nominate, holders must:
 - Submit a request via the project's DAO governance portal
 - Provide verification (e.g., identity proof, wallet ownership)
 - Specify the nominee's details and conditions for token transfer
- The DAO will review and approve nominations based on predefined criteria.
- Nominees will need to verify their identity and comply with project policies to access the tokens.

Disclaimers

- This nomination and token transfer.
- This process is subject to applicable laws and regulations.
- ALIEN project is not liable for any losses or issues arising from nomination or token transfer.
- Holders are responsible for tax implications (if any) related to token transfer.
- This process does not constitute legal advice; consult a lawyer for specific guidance.

Jurisdiction

- This nomination process is governed by the laws of [Jurisdiction, e.g., Singapore].
- Disputes shall be resolved through [e.g., arbitration in accordance with the rules of the Singapore International Arbitration Centre

Roadmap

- Q2 2026: Renounce mint, publish legal opinion on non-security status.
- Q3 2026: Integrate 2 additional regulated PSPs for EUR/USD corridors.
- Q4 2026: Apply for Tier-1 CEX spot listing subject to volume requirements.

BuyBack Program

- Periodic Buybacks: Schedule buybacks quarterly or bi-annually based on profit cycles.
- Price Floor Mechanism: Use buybacks to maintain a minimum price floor for Alien token.
- Staking Rewards Integration: Offer bonus Alien tokens to stakers or long-term holders during buybacks.
- Transparency: Publish buyback transaction hashes on-chain for verifiability.
- DAO Governance: Let the community vote on buyback amounts or mechanisms via a DAO.

Risk Management

Inflation: Balanced by periodic burns and DAO policies.

Liquidity: is crucial for ALIEN's success on Market Making. To manage liquidity risk and run up to multiple exchanges, you might want to consider:

Market Making Services: partnership with market makers to provide continuous buy and sell orders

Monitor Trading Activity: Keep an eye on trading volume and adjust strategies accordingly

Buyback program: the Nexus Buyback Program Service and reserve plan sixty-nine trillion United States dollars agreement signed in total.

Branding Alien©: Cointore 2.0 Marketing Package, X Premium, Nexus Kol, AMA Event, Meta AI Verify, Youtube and Spotify Subscription.

Security: Regular smart contract audits and bug bounties

Regulation: Adaptive compliance with international standards.

Copyright: Copyright law protects original creative works, like books, songs, sculptures, paintings, website content, and logo.

Compliance & Disclaimer

Alien is a cryptocurrency and not registered internationally. This document is for informational purposes only and does not constitute investment advice or a solicitation to buy or sell alien tokens. Consult a financial advisor before investing. Alien tokens availability and regulatory status vary by jurisdiction. Verify local laws before participating.

This whitepaper is for informational purposes only and does not constitute investment advice.

Participation in digital assets involves risks including volatility, smart contract exploits, and regulatory action.

Alien© is governed by the laws of jurisdiction and the content provided is an english translation and summary for reference only, not legal, investment, or financial advice.

The document outlines the listing agreement for "Alien©" and includes a disclaimer : the "Alien©" listing agreement was officially signed with Mecx, Hotcoin, Coinstore,

Pionex and Lbank.

The "Alien©" share holding required to pay a contribution fee for securing at least sixty nine trillion dollars loan for liquidity and BuyBack.

The "Alien©" must timely disclose any significant "Alien©" changes to ensure market transparency and investor awareness.

The value equivalent to all national currencies based on new balance coded, uses an unlimited supply model governed by algorithmic issuance with periodic coded to new balance value.

Alien© Use First Methodology

Alright! Let's add some more meat to it. Here's an updated version:

Alien©: A Novel Approach to Payment Systems

Introduction

Traditional payment systems face challenges in cross-border transactions, currency conversions, and security. Alien© introduces a token-based system for flexible, secure payments.

Key Features

- Token Generation: Payment info generates a unique Alien© token, stored in a private wallet.
- Multi-Currency Support: Used for payments in various national currencies, with verification.
- Trust-Based System: Leverages trust and verification for secure transactions.

Use Cases

- Cross-border payments
- Crypto transactions (e.g., Pionex)
- Legal services (e.g., royal asean law firm)

Benefits

- Flexible payment options
- Enhanced security
- Streamlined transactions
- Reduced transaction costs

Implementation

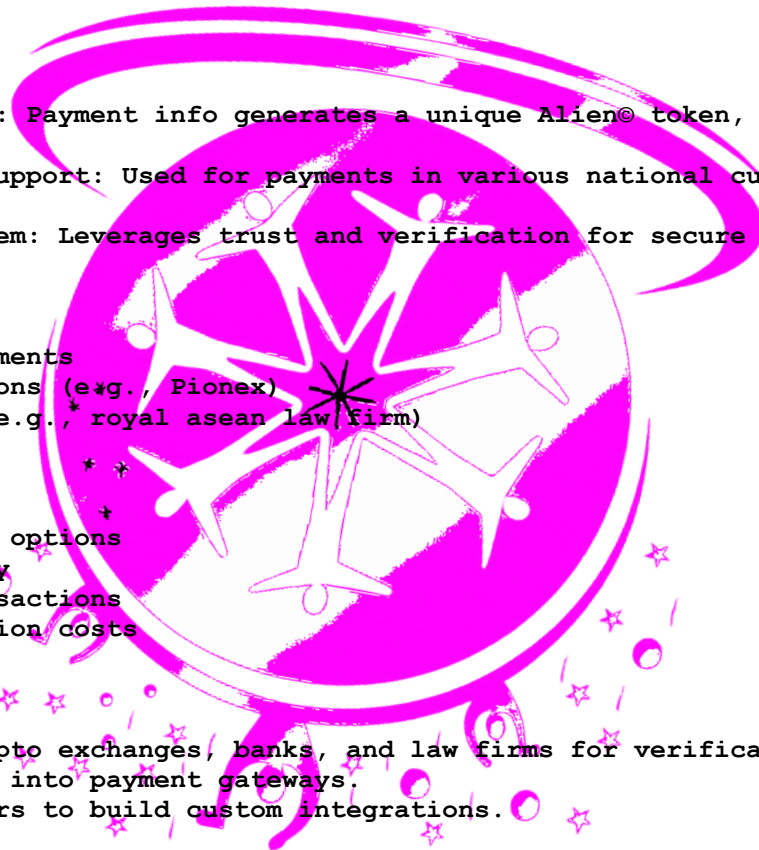

- Partner with crypto exchanges, banks, and law firms for verification.
- Integrate Alien© into payment gateways.
- API for developers to build custom integrations.

Technical Details

- Blockchain-based token management
- Multi-signature wallets for added security
- Compliance with AML/KYC regulations

Future Outlook

Alien© aims to simplify global payments, promoting financial inclusion. Potential partnerships with major payment processors.

Tokenized RWA : Settlement in Alien© Gold ETF 2050

Feature	Traditional Stock (Gold ETF 0828EA)	Tokenized RWA (Alien Gold ETF)
Purchased via	brokerages	Crypto exchanges
Ownership	Direct ETF units (real gold)	Digital token
Payment	Fiat	Fiat + USDT
Accessibility	Brokerage accounts required	Easier global, simpler KYC
Trading Hours	9am/5Pm.	24/7.
Max Supply	-105M units (-1M + grams gold)	900 septillion Alien tokens

Diversified RWA Portfolio: Private Islands & Gold

Leveraging the power of tokenization, Alien Gold ETF 2050 offers investors a unique opportunity to diversify into Real-World Assets (RWA), including private islands and gold.

RWA Private Islands: A Lucrative Opportunity

- Fractional ownership of luxury private islands
- Global access to island investments
- Potential for rental income and appreciation in value

Popular destinations include the Caribbean, South Pacific, and Europe.

Investment Platforms

- Mattereum: Tokenizing high-value assets, including private islands
- JamesEdition: Luxury marketplace featuring private islands for sale

By incorporating RWA private islands into our investment strategy, Alien Gold ETF 2050 aims to provide investors with a diversified portfolio and increased potential for returns.

RWA Alien© Market Capital 2006-5000 Integration

Alien Token serves as a bridge between the TradePlus Shariah Gold Tracker and the decentralized finance (DeFi) ecosystem, transforming a regulated commodity ETF into a liquid, crypto-native utility asset.

1. Gold ETF Details: TradePlus Shariah Gold Tracker

Asset Name: TradePlus Shariah Gold Tracker (Bursa Stock Code: 0828EA).

Custodian: Physical gold bars (99.5% fineness) are held in a segregated and allocated manner in a secure vault in Singapore, managed by a professional custodian.

Audit Process: The fund undergoes a physical vault audit at least once per annum by a team including the Manager (AHAM Asset Management), Trustee, Shariah Advisor, and an external Auditor.

Compliance: Fully Shariah-compliant, guided by Amanie Shariah Advisors and regulated by the Securities Commission Malaysia.

2. *Backing Mechanism Confirmed:*

- *1:1 Valuation*: Each Alien token pegged to a fractional GOLDETF unit (~0.01g gold equivalent).

- *Verification*: On-chain PoR cross-checks fund's daily NAV vs. token supply.

3. Expanded DeFi Use Cases

Collateralized Lending: Use Alien tokens as collateral to mint stablecoins or borrow other assets on DeFi platforms like Aave or Compound, leveraging the "hard asset" stability of gold.

Trading Gold Exposure: Trade gold volatility 24/7 on decentralized exchanges (DEXs) like Uniswap without waiting for traditional market hours.

RWA Settlement: Use Alien tokens for instant settlement in real-world asset transactions, reducing the multi-day clearing times associated with traditional ETF trades.

4. Risk Management

Volatility: While gold is a "safe-haven," it remains subject to global market price fluctuations.

Tracking Error: The underlying ETF aims to mirror the LBMA Gold Price AM, but may experience minor tracking errors (typically <0.10%) due to management fees or cash holdings.

Regulatory Risk: Changes in crypto or RWA regulations in Malaysia or Singapore could impact the token's bridge to the physical ETF.

5. Transparency & Shariah Compliance

Shariah Structure: The TradePlus Gold Tracker is Malaysia's first Shariah-compliant commodity ETF, avoiding Riba (interest) and ensuring all gold is physically present.

Reporting: Investors can track the list of specific gold bars (including serial numbers and weights) via monthly updates provided by the fund manager.
