

Moving Sale Price List

All prices are still subject to adjustment. Items may still be added or removed from this.

There have been a few people unclear on this so I want to be explicit. **The minimum order is 10 mh. That does not mean you can order some of the 10 now and some of the 10 later when you decide what you want.** That is double the amount of work for me because I have to open up all the databases again to run an order for you twice. 10 minimum means you have to have 10 tokens worth of stuff any time you place an order. If you order less than 10 tokens worth of work you will be charged 10 tokens. Please have your complete order together when you put yourself on the waitlist. This is the only way these prices make financial sense for me. I would have to charge more per token if I was doing split orders like that.

Thank you so much for your understanding.

Prices are listed in Moving Helper Tokens with each token = 5USD

Misc Small Items

1 MH token - Set the era of any unbred horse you own to an earlier era. This is not a boost and does not impact breeding ability. Great for eras with no foundations anymore, and can be added to the below cloning options. *For example an era 12 could become an era 3 but not an era 13.*

1 MH Token -Change the name or breed characteristic of a horse you used to own but is now deceased. *Can't have foals owned by other players unless you were the last owner.*

1 MH Token -Change the height or bone weight of any lined unbred horse you own to any creatable height/bone weight. *Can be bred already if you own all the foals.*

1 MH Token - Add up to 50 words to the random name generator. *Gemstones, pokemon, Tolkien elves, give me a comma-separated list and I will add them in. For example: red, orange, yellow, green, blue*

1 MH Token -Breeding ability consult for 1 barn/pasture: I tell you with 100% accuracy, which is your best and worst breeding horse (or horses in the case of a tie) in that barn/pasture by looking at the hidden numbers. With extra attention paid to who is intact or not. The cost is per barn/pasture.

1 MH Token -Breeding ability consult for 1 horse: I tell you with 100% accuracy, which is your best and worst breeding offspring of a horse by looking at the hidden numbers. With extra attention paid to who is intact or not. The cost is per sire/dam.

1 MH Token -Delete every straw/egg owned by you from a single horse on a single account.

1 MH Token -Change the rules of any one breed owned by you.

1 MH Token -Know for sure if two horses you own are cap quality or not.

Fun with Foundations

2 MH Tokens-Make any unbred foundation horse breeding cap quality (with a 7-era penalty). You may then double-boost that horse on your own if you so choose. *You provide the 7 5% boost MH Tokens, expros only need 6 5% boosts*

-or-

25 MH Tokens -Make any unbred foundation horse breeding cap quality (with a 7-era penalty). You may then double-boost that horse on your own if you so choose. *I provide the 7 5% boost MH Tokens, no discount for expros as this is already a discounted price*

2 MH Tokens -Have 10,000 show points assigned to 1 **foundation** horse of your choice. If added to a foal the lifetime payout will be between 500k and 1 million. Use young horses as points from past years will be overwritten. - limit 5 per player per server, **foundations only**

Cloneing

2 MH Tokens - Clone an otherwise impossible-to-clone horse. Please use the cost to clone page linked on the forum post for price info. You pay the IV cost plus 2 MH Tokens. *Gene licenses are not included.*

-Clone any foundation horse in the game regardless of living/dead, owner, or breeder.

-Clone any living lined horse with breeder and owner permission*

-Clone any deceased lined horse with breeder permission*

-Can not clone clones.

-or-

20 MH Tokens - Get any of the “impossible clones” above but pay only the 20 MH Tokens, no IV charge.

3 MH Tokens -Clone any lined horse (including deceased and regardless of breeder) and have it be created as a perfect ability foundation horse. I will quote you what the price will cost in IVs for the clone. You pay the IV cost plus 3 MH Tokens. *Gene licenses are not included.*

-or-

21 MH Tokens - Clone any lined horse (including deceased and regardless of breeder) and have it be created as a perfect ability foundation horse. You do not pay any IV costs. This option is for horses that would be prohibitively expensive to clone. *Gene licenses are not included.*

Seed Stock

2 MH Tokens - 100 straws, or 30 eggs from any deceased horse with the last owner's permission*

2 MH Tokens - 30 eggs from any of-age mare you own

Either of the above can be purchased multiple times with a limit of 500 pulled per horse in game.

Barn & Pasture Edits

1 MH Token + difference -Convert any pasture into a larger version, just pay 1 token plus the price difference, rounded to the nearest \$5.

1 MH Token + difference -Convert any barn into a larger version, just pay pay 1 MH Token plus the price difference, rounded to the nearest \$5.

2 MH Tokens - Merge 5 empty 210 barns into a 1000 stall barn

~~**3 MH Tokens** - Merge 5 not empty 210 barns into a 1000 stall barn~~ - I am no longer offering this option.

Most barn and pasture merging or splitting will be decided on a case-by-case basis. The numbers are too complex to make a full list. The general rule will be, that you have to be reasonably close in stall count to the target. 2 MH Tokens for dealing with empties. 3 MH Tokens if I have to shuffle your horses around. You can name what you think is reasonable for me to sign off on before purchasing.

2 MH Tokens per 50 stalls - Create a custom-sized barn in any interval of 50 you want *1k is the hard max.*

Herd Helpers

1 MH Token -Convert any unbred exceptional rank special horse into a normal perfect create. Removes the era penalty.

3 MH Tokens - Pick any herd helper to be assigned to your account. Cost is the same regardless of rank (only the count changes). These will not have the option to share the herd helper. Can purchase multiple times if you want more than the listed number of creates This will last 5 days so that you don't have to create everything in one sitting. This is 1 herd helper with a long window not 5 days of herd helpers.

- Any rank 5 and below - 250 creates
- Any normal Rank Special 50 creates
- Any "special event only Rank Specials" 10 creates *This includes genes like S+, p+, satin, etc*

10 MH Tokens - Design your dream Herd Helper. Can be a modification of a prior one or an all-new concept.

- Price is the same regardless of rank.
- I will decide what rank and if the hh is in normal rotation based on how fancy(how many GMTs) the hh is.
- You provide the name and description text for rank specials. Subject to approval.
- Only genes already possible on Herd Helpers can be picked from.
- You can use up to 20ish GMTs worth of rare genes in your herd helper. Prices are based on the GMT lab normal price. Genes that only cost 1 GMT do not count against your 20. (I have some flex on this. Talk to me before buying.)
- Adding exceptional status costs 5 GMT
- Once created your herd helper will be a permanent addition to all servers.
- You will receive the "Pick any herd helper" deal above for free with your new herd helper on one account.

Member Mashup Tack Pack

10 MH Tokens YOU create up to 10, 500 by 500 px images. They must all be approved before I will accept payment. We will add the game logo and add it to the game as an option for any player to purchase. The images you create will be added to a new tack pack created for the sale called "Member Mashup".

- All moving sale backgrounds will be added to a new "Member Mashup" tack pack.
- Background submissions must be 500 x 500 px. All other sizes will be rejected.
- Please do not photoshop game horses onto the backgrounds, it makes them much harder to evaluate.
- Backgrounds must have a clean/clear ground area for the horse to stand on about 100 pixels high.
- Avoid anything in the foreground that would need to be "in front" of the horse.
- Background images must not be pixilated or look low res.
- Art styles must be complementary to the horses in the game.

**Permission is deemed granted automatically if the breeder/owner (for cloning) or prior owner (for seed stock) if the player has been inactive for 6 months or more. If the player is still active, permission must be obtained before I am contacted for this service. I will be quick to turn down any cloning requests if I feel it will cause drama.*

Everything listed above has the caveat of "within reasonable limits." I reserve the right to reject anything if I think it is going to cause problems/drama in the game. Everything will be finalized on a case-by-case basis because I can not possibly address every edge case in this post.
