

MASTER OF REHABILITATION MEDICINE - MD779

DURATION OF STUDY: 4 YEARS/ 8 SEMESTERS

INTAKE: JUNE

Synopsis

The Master of Rehabilitation Medicine Programme at Universiti Teknologi MARA (UiTM) is a full-time four-year program conducted at UiTM and Ministry of Health Malaysia (MOH) facilities, offering extensive clinical exposure and hands-on learning.

The program is structured into two stages. Stage 1 (First Year - 12 months) covers foundational training and concludes with the Part I Examination. Candidates must pass this exam to progress to Stage 2. Stage 2 (Second to Fourth Year - 36 months) focuses on advanced clinical training and specialization, culminating in the Final Examination. Successful completion of Part II is required to qualify as a Rehabilitation Medicine specialist.

Entry Requirement

General
• Has a recognised medical degree. • Minimum of one (1) year experience after housemanship/ internship at the time of entry into the programme. • Has sat for the Medical Specialist Pre-entrance Examination (MedEx) for Rehabilitation Medicine and holds it validity during the application. • Passed the entrance examination and interview organised by the Conjoint Board Committee of Rehabilitation Medicine of the Malaysian National Universities. • Meet the additional requirement set the the Universiti Teknologi MARA (UiTM). • Proof of financial guarantee or scholarship.
Malaysian
• Has a Full Registration Certificate with the Malaysian Medical Council (MMC) • Has a valid Annual Practising Certificate (APC)
International
• Has a valid medical practicing certificate from the regulatory authority of the current country of practice • Temporary Practising Certificate issued by the Malaysian Medical Council (MMC) • Has a valid English competency certificate either IELTS (minimum Band 6.0) or TOEFL (minimum score of 550)
Special Needs
• The department is committed to an inclusive and supportive learning environment in line with Rehabilitation Medicine principles. • Given the intensity of the training and nature of clinical placements, candidates with special needs are advised to contact the department before the attempt for the Medical Specialist Pre-entrance Examination (MedEx) for Rehabilitation Medicine.

- All prospective applicants will be evaluated individually.
