

1. Briefly describe your research, giving its justification and rationale. Your description should be a minimum of 5 - 10 sentences. Many proposals will include descriptions that are several paragraphs long. Be sure to include at least two references to previous research on your topic.
2. What are the foreseeable risks? Please list the foreseeable risk(s) to participants, describe how you will minimize each risk, and why each risk is justifiable in light of benefits (either directly to the participant or indirectly to generalizable knowledge) to be gained by the research.
3. Participants
 - a. Who are the participants?
 - b. Approximately how many participants will you recruit?
 - c. How will you recruit them?
 - d. Note the estimated time duration of participant participation.
4. What steps will you take to assure the participation is voluntary?
5. What will the participants do? How will you interact with them? Describe any bodily invasive procedures they will encounter.
6. Instruments
 - a. Please attach a PDF copy of any questionnaires or similar instruments.
 - b. Will you be using copyrighted materials to conduct your research? In order to use copyrighted materials for research purposes, you must have permission from the copyright holder. If you have evidence of permission, you may upload it below. If you do not have written permission, please explain how you obtained permission to use these materials. In some cases, it may instead be necessary to explain how you will be using these materials in accordance with the applicable copyright laws.
 - c. Describe any other equipment you will use or with which the participant will interact.
7. Will you debrief your participants? If so, how will debriefing be handled? If not, please provide an appropriate justification.
8. Do you have any additional files you wish to upload or information you would like to provide?
