

Ellevation Activities and SIOP Activities Crosswalk

What are Ellevation Activities?

Ellevation Strategies was designed to directly **enhance** in-person PD models like SIOP.

- Ellevation provides job-embedded sustainable professional development that reinforces ongoing instructional improvement.
- Ellevation allows practitioners of SIOP to find additional activities **online** which they can access anywhere.
- Teachers can easily find relevant instructional activities based on the **linguistic needs** of their students or connections to their **academic content** by grade level, subject area, topics and/or standards.
- Teachers can make differentiation decisions based on **data** with language **scaffolds** for specific students based on recent proficiency levels.
- We have **videos** which demonstrate how to effectively implement the instructional activities in the classroom. We offer for various grade clusters and subject areas.
- While SIOP teachers might have to create or find their own graphic organizers and support documents, Strategies offers wide variety of **downloadables** right within the application.

How can you find Ellevation Activities that support your favorite SIOP Activities?

SIOP Component	If you like this SIOP Activity....	Try this in Ellevation!
