Dear RDCK Board of Directors (or your RDCK rep only if you prefer),

I am a resident of _____ [personalize about yourself and what you love about living where you live].

I ask that you support RDCK being part of the Sue Big Oil Campaign and join with other local BC governments to file a class action lawsuit to recover a fair share of our climate costs.

As you know, we are seeing ever more severe wildfires, storms, heat waves and droughts. Taxpayers are currently on the hook for paying the costs, while oil companies are making record profits. These multinational companies spent millions over decades to deceive, deny and distract us to prevent action on climate change. (Please use your own words)

[Close by tying in to what you love about living where you do and how that is threatened by climate change.]

Thank you.

Sincerely,

[Name and address]
