[THREAD]

We're sorry to say that the listing of BCX has been delayed once again, this time till December 20th.

Here are the reasons why this happened:

.

First, the unofficial liquidity pool created by one of the malicious actors did more damage than we expected. To tackle this, we're moving BCX from Binance Smart Chain to the Polygon network.

👉 This will also increase our chances of listing on the top 20 exchanges.

.

We are yet to complete our deals with some of the best exchanges. We're already in the final stages of that.

In addition, we're still working on market-maker implementation and the market-maker fund.

.

We're aware of the concerns of this unexpected listing delay, but as you now know, BlockX hardly has a choice given the above-outlined situation.

With the Polygon network behind BCX, more flexibility and efficiency will be brought, in addition to lower transaction costs.

.

To move to Polygon, we'll unstake the holders' tokens, send them back with the rewards, and airdrop the new Polygon-based tokens to everyone after the snapshot taken tomorrow, Oct 29

.

Despite the unfortunate news, we have exciting product updates.

- BlockX Exchange is LIVE
- DEX is actively being built
- Validators being onboarded
- BlockX Station is open

.
