(List essential equipment and tools the farm sitter might need)

Farm Sitter Information Sheet

Fence and Gate Maintenance:

- Fence and Gate Instructions: chain and tie ALL gates

Weather Precautions:

- Weather-related Precautions: take blankets off during the day if temp is over 38-40

Livestock Handling:

- Safe Handling Techniques or Special Instructions:

tip toe around roo and be aware of how she feels, ALWAYS end on a good note with her.

ride 1 hour per horse unless told otherwise.

30 min working if not being ridden.

feed every horse separately or they will fight.

watch your surrounding and pay attention to how each horse is acting and how the are under saddle and tell me your notes.

do not let them get away with things i would get at them for.

don't be afraid to discipline according to what they do.

you may have to run reba into pasture C and close the gate to catch her.

never finnish your ride on a bad note. make sure you wait to get off until youre happy with what they do and they are confident and not fighting what you ask.
