

# Story Board Template

(Last revised: 8/2022)

A Story Board functions as the outline for your StoryMap, allowing you to sketch out the components of your project before jumping into the program. Below are a few Story Board examples to model your own on, each of which corresponds to a different StoryMap component. Of course, you will want to expand on these depending on the scope of your project.

## New Builder Template

(Map, Guided Map Tour, Sidecar)

Section	Text summary	Image(s)	Map(s)
Introduction			
Section 1			
Section 2			
Section 3			
Conclusion
