Ask me about:

The following items are on a case-by-case basis and I retain my right to refuse anything I'm uncomfortable accepting.

- NSFW (This will add an additional charge)
- Mimicking a different style
- Working from fully text-based descriptions
- Deadlines. If you have a specific deadline, let me know in advance and I will do my best to have these done by then. There may be an additional fee for commissions that must be rushed and would change my already established queue order.
- Commercial work.

Art Editing policies:

Please pay attention to which pieces offer a sketch phase or not. Small commissions typically do not offer a sketch to approve. These pieces will allow for minor edits only.

The sketch phase is where all major edits should happen. So please be sure to ask for any changes (especially major changes) during the sketch phase. Edits before an approved sketch are free.

However sometimes things aren't as clear until the image has been more refined. In those cases, please refer to the following.

- Minor edits are free of charge for the first two edits. Additional edits will cost an additional +15\$ each.
Minor edits include things like, facial expression tweaks, hairstyle adjustments, small accessory or jewelry additions or subtractions, and colour adjustments.
- Major changes will cost an additional +40\$ each.
Major changes include things like changes in pose, compositional changes, outfit changes, whole palette changes and adding or removing major background elements.

Sending good references:

References can be intimidating but here are some tips.

- For characters with already set basic references, such as an ingame representation, screenshots are very valuable. Try to take screenshots in neutral toned, bright lighting. Multiple angles and at different levels of zoom are a plus to better see details of the face, armour and/or hairstyles.
- But given that character creators can be rather limiting, your vision of the character might differ a bit from the screenshots. Finding various photos online of a face claim, a body type claim, or things like accessories, hairstyles, or outfits. Even a mood reference can help a great deal to show me what you're after without trying to describe it in words like 'cottagecore' or 'gamer' or 'goth' exclusively.
- Also please keep in mind (since many of my commissions come from mmo players) if your commission includes a background and the setting is a specific location in the game you play, do provide some screenshots of the area so I can properly capture the area's architecture, plants, lighting, etc.
- If you have no true reference, such as screenshots or even other established art of the character, such as reference sheets or other commissions. Then using the above method of creating an image collage is a valuable tool. Showing and talking about what you're showing is usually always better than telling in text exclusively. English is not my first language and sometimes things get missed or lost in translation. So please be patient with me!
- Once you've gathered your references, sometimes the file sizes are too large to be attached in an email. There are other services that will hold your references that you can link to instead. Imgr is one of the easiest ways. It will allow you to create a gallery and link to that gallery for free. There are also services like Dropbox. Toyhouse will allow you to create a full gallery for individual characters.

Tarot

What you get:

A stylized and symbolic representation of your character! There is a specific card format I use as border detailing. I'll work closely with you to accurately represent the chosen arcana, specifically for your character.

If you don't know a specific card for your character I will work closely with you to help you pick one!

The style for these are more muralistic rather than a fully rendered scene.

For Ordering:

- Character full body reference with a zoomed portrait reference. From multiple angles and in neutral-toned bright lighting (for things like screenshots).
- Additional screens or images of the type of scenery/background elements as needed.
- Additional screens or images of specific outfits, styles, pets or other animals and/or accessories as needed.
- Any additional addons you're wanting.
- Because of the nature of this commission I will need some more detailed information of the character's personality and story. Please try to keep it to a few paragraphs rather than several pages. Usually these tarots will represent a major event or turning point in your character's life or a major personality trait. Try to keep your idea centered around one of these things, rather than a detailed full timeline of their life in their world.
- If you already have a specific tarot in mind, be sure to list it, as well as the specific symbolism you feel will tie into that card well. If you don't I'll work with you to find one.
- I will ask follow-up questions as I need to, to make sure I get the details right!

You'll get a preview sketch to approve and once a preview sketch has been approved, you'll need to pay at least half of the full commission price.

Once payment has been received, I'll start working on refining and detailing out your commission. I will likely send more WIPs as I go, where you can request minor changes as needed.

Works in progress can be requested at any time.

Full payment will be due prior to finishing the piece.

Prices vary due to complexity so if you're not sure, ask!

Base Prices:

- 300\$

Add ons:

- Simple background +30\$
- Complex background +100\$
- Complex outfit +80\$
- Additional limbs (wings, etc) +50\$
- Additional character (duality, max 2 characters) +80\$
- More detailed rendering +100\$

If you seek a less limited format, check out a full illustration instead!

Tarot style is meant to mimic an actual card personally designed for you, of your character. This does have its limitations to fit in this specific format without being cluttered.

Full Illustration

What you get:

A full and highly detailed painted render of your character or scene. This is the best format for really representing your full idea. The sky's the limit. Whether it's a more stylized and symbolic representation of your character or a full scene, it can be done.

This is the only format that will allow for more than two characters interacting in a scene or setting.

Due to the scale and detail of these images, they will take longer to complete so do have patience after ordering.

For Ordering:

- Character(s) full body reference with a zoomed portrait reference. From multiple angles and in neutral-toned bright lighting (for things like screenshots).
- Additional screens or images of the type of scenery/background elements as needed.
- Additional screens or images of specific outfits, styles, pets or other animals and/or accessories as needed.
- Any additional addons you're wanting.
- Please describe the scene you're wanting. Keep it short and informative. Having a clear vision of what the interaction, movement, mood, and themes will help me accurately represent what it is you have in mind!
- I will ask follow-up questions as I need to, to make sure I get the details right!

Keep in mind my rough conceptual sketches are vague with not many details. They serve to introduce you to the composition, character placement, visual storytelling and mood/atmosphere for the piece. Please make sure you're happy with all of the above things before moving forward. I'll keep making changes until you're happy with it. I **will charge** for major alterations to these things after approval.

Payment of at least half of the full amount will be due at this time.

Only after your approval and payment of these concept sketches will I start adjusting proportions and refining details to prepare it for rendering. Once more details have been defined I will send another WIP update to make sure that everything is on track for your vision, and for you to make any needed adjustments to the details.

From there I will continue to work until I've finished your commission! Again these works do take time, so please have patience. You can ask for progress updates at any time.

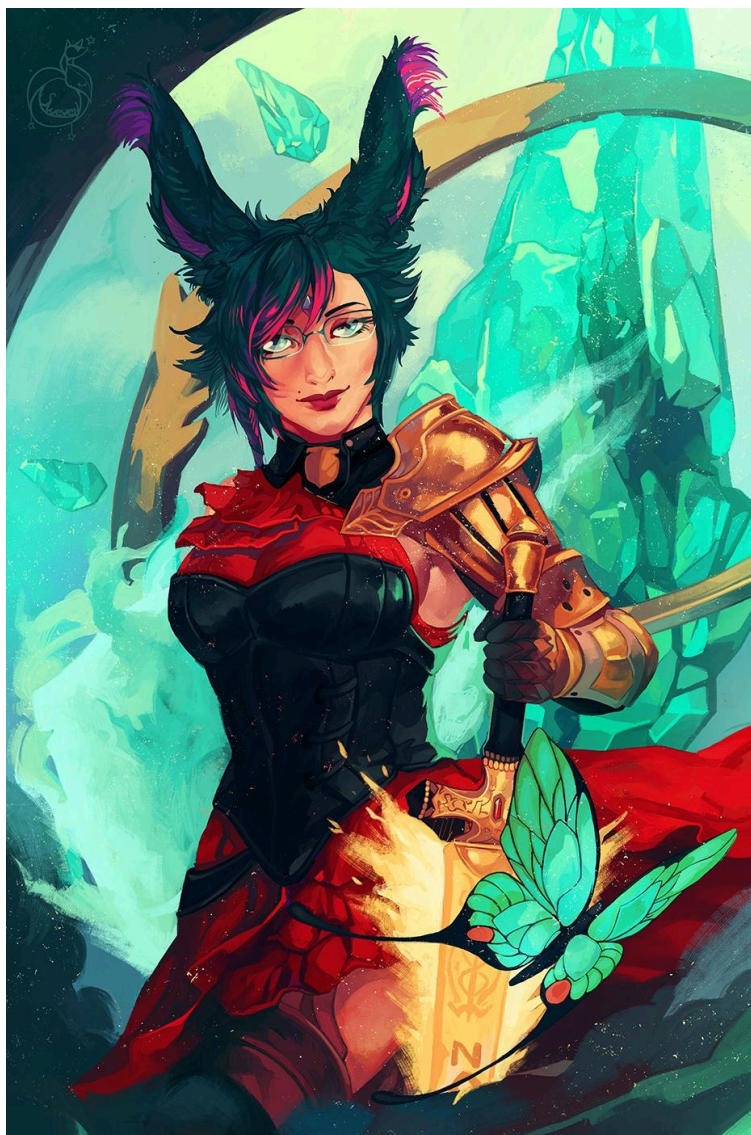

Payment in full will be due before the finished image will be released.
