Student Name:	Application ID #:

Subject:
Scope / Overview of Class:
Sequence / Method of Teaching / Lessons:
Materials Needed and Description of How the Materials will be Used:
Comments: STUDENT NAME is participating in an educational program established within their home environment and this curriculum is parent prepared.

To save time when creating a curriculum for ordering items for your student, try these steps:

1. Go to ChatGPT and copy & paste the following prompt:

"Create a simple curriculum for one student, [STUDENT NAME], focused on [ITEM or TOPIC], using the fewest words possible. Do not include * or # symbols. The curriculum should have six sections:

  - Subject Title: A subject related to learning.

  - Scope/Overview: A brief description of what the class will cover.

  - Sequence/Method of Teaching:*A bulleted list of lessons or steps, written concisely and clearly.

  - Materials Needed: A list of required materials and how they will be used.

  -Comments: Include the statement, '[STUDENT NAME] is participating in an educational program within our home environment, and this curriculum is parent-prepared.'"

2. Review the generated curriculum to ensure it aligns with your child's needs and is age-appropriate. If you're not satisfied, type "regenerate" to get a revised version.

3. Use the provided editable template to input the finalized curriculum. Once completed, save the document as a PDF and submit to ESA with the order. Don't forget to delete these instructions before exporting to a PDF document.
