HASIL/RESULT

Karakteristik Responden

sub bab pembuka bab hasil harus menampilkan karakteristik responden.

Sub-Bab

Sub bab kedua ini dapat dimulai dari hasil analisis yang dilakukan, apabila terdapat tabel, grafik, atau gambar yang dilarang print screen, dan harus diberi keterangan cara membaca dan memahaminya.

Respondent Characteristics

The opening sub-chapter of the results chapter must display the characteristics of the respondents.

Sub-Chapter

This second sub-chapter can start from the results of the analysis carried out, if there are tables, graphs, or images that are prohibited from being print screened, and must be given an explanation of how to read and understand them.

DISKUSI/ DISCUSSION

Sub-Bab

Bab ini berisi pembahasan bab hasil, dilarang menampilkan statistik, pembahasan harus selengkap mungkin, dan disertai kajian sebelumnya. Akan lebih baik jika dipisahkan sub bab tentang hubungan antar variabel satu per satu disertai dengan penelitian terdahulu baik yang mendukung maupun yang tidak mendukung, keduanya harus diberi alasan bagaimana terjadinya. Selain itu juga menunjukkan perbedaan dari penelitian sebelumnya dengan penelitian ini. Studi sebelumnya terdaftar setidaknya memiliki lebih dari 1 dan satu dengan tahun terakhir.

Sub-Chapter

This chapter contains a discussion of the results chapter; it is forbidden to display statistics, the discussion must be as complete as possible, and accompanied by previous studies. It would be better if the sub-chapters were separated on the relationship between variables one by one accompanied by previous studies that support and do not support, both must be given reasons for how they occurred. In addition, it also shows the differences between previous studies and this study. Previous studies are listed at least having more than 1 and one with the last year.
