

WCAG 2.x > 3.0 mapping doc

WCAG 2.x ID / name	Consistent Help
Who worked on this? (first and last names)	Rachael Bradley Montgomery
Functional need(s)	• Use with limited vision • Use with limited ability to focus attention • Use with limited ability to direct attention • Use with limited ability to shift attention • Use with limited ability to comprehend spoken language • Use without ability to read • Use with limited ability to recognize written language • Use with limited ability to comprehend written language • Use with limited short-term or working memory • Use with limited medium or long-term memory • Use with limited sensory memory
User need(s)	Users can discover content
Unit(s) Component / View / User process / Aggregate	Aggregate
Test type(s) Objective / Condition / Test Case / Protocol	Objective
Requirements from the understanding doc	*As written the current SC is objective. The quality of the help could also be assessed.
User agent or authoring tool relationship that needs to be supported?	Long term personalization may be a part of this guidance but not in its current state. There are beneficial options around consistent look and feel which could potentially fit within the Test Case concept.

Sub-guidelines - None
