

Authoring tools

Draft RESOLUTION: The group will explore: 1) Identifying provisions which could have methods that contribute to ATAG, 2) Creating a provision that calls for creation interfaces to allow for WCAG-conformant content, 3) Having some type of claim of conformance for the editing interface, 4) Outlining policy advice for making use of these aspects, 5) co-ordinating with ATAG CG.

Final

Draft RESOLUTION: The group will:

1. identify provisions which could have methods that apply to authoring and uploading functionality,
2. explore an approach to claiming conformance that applies to authoring and uploading functionality,
3. Include challenges about user generated content in the policy document,
4. Coordinate with ATAG CG on the way forward.

Draft RESOLUTION: The group will: 1) identify provisions which could have methods that apply to authoring and uploading functionality, 2) explore an approach to claiming conformance that applies to authoring and uploading functionality, 3) Include challenges about user generated content in the policy document, 4) Coordinate with ATAG CG on the way forward for all of the above.

Rachael rewrite

Draft RESOLUTION: The group will explore:

- Identifying provisions which could have methods that apply to functionality which allow end users to create or upload content, and creating those methods,
- Ways to enable or encourage ATAG style solutions into WCAG 3
- Having some type of claim of conformance for interfaces which allow end users to create or upload content,
- Include challenges about user generated content in the policy document
- co-ordinating with ATAG CG.

Kevin rewrite for point three:

Explore including a content generator class of product which claims of conformance can be made for.
