ABSTRACT (10 PT)

A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 100 to 200 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article (9 pt).

1. INTRODUCTION (10 PT)

The main text format consists of a flat left-right columns on A4 paper (quarto). The margin text from the left and top are 2.5cm, right and bottom are 2 cm. The manuscript is written in Microsoft Word, single space, Time New Roman 10pt and maximum 12 pages.

The introduction must contain a general background (shortly), a literature review (state of the art) in order to record the existing method/solutions, to show which is the best of previous researchers and to show the main limitation of the previous researches. It has been contained with at least 5 literature in order to justify novelty this paper. The introduction should be clearly contain the gap analysis (why this research

needs to be done? What is the uniqueness of this paper compared to previous papers?) as the basic of the new research question, statements of the new scientific article and main research problems (novelty).

Example of novelty statement or the gap analysis statement in the end of Introduction section (after state of the art of previous research survey): "..... (short summary of background) ..... A few researchers focused on ..... There have been limited studies concerned on ..... Therefore, this research intends to ..... The objectives of this research are .....".

2. METHOD (10 PT)

The method is applied to solve problems including procedures, measuring and analytical methods. Methods should make the reader able to reproduce your experiment. Provide enough detail to allow the work to be reproduced. The published method should be indicated by reference: only relevant modifications should be explained. Do not repeat details of existing methods, just refer it from the literature.

Refernce in the discussion is marked by literature number which is referenced in square brackets. Examples: [1], [2, 5–7], or [2–5, 12–13].

3. RESULTS AND DISCUSSIONS (10 PT)

Manuscripts can be presented with the support of tables, graphs or images which needed to clarify the results of presentation verbally. Results and discussion is shown clearly and concisely.

Figure and format tables is using center alignment. Each of figures and tables are given number and description, as well as referred to the writing. Number and figure title is placed below the image, as shown in Figure 1.

Figure 1. Cameraman was taking pictures

Provisions writing of title figure:

1) The initial letters are capitalized, unless an acronym should be written in capital letters.
2) The writing of the corresponding provisions must be uppercase, eg name of province (Central Java), etc.
3) Color figures are made in black and white, in order to be readable when printed.
4) Figure should not be compressed in order to not chapped.

Number and title of the table is place on the table which concerned and made in center alignment. In Table 1, shown the following example of writing the number and title of table. The Table is recommended to not using vertical lines, only horizontal lines (on the header and footer), as for example shown in Table 1.

Tabel 1. The table form which used, table font is adjusting (not must 10pt)

ID *term*	DF	ID 173		ID 174		ID 175		ID 176	
		NT	LT/LN	NT	LT/LN	NT	LT/LN	NT	LT/LN
1	3	0	0	0	0	0	0	1	1
2	1	1	1	0	0	0	0	0	0
3	1	0	0	0	0	0	0	0	0

4	1	1	1	0	0	0	0	0	0
5	1	1	1	0	0	0	0	0	0
6	1	0	0	0	0	2	1.3	0	0
7	1	0	0	0	0	0	0	0	0
8	1	0	0	1	1	0	0	0	0
9	1	0	0	1	1	0	0	0	0
10	1	0	0	0	0	0	0	0	0

4. CONCLUSION (10 PT)

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion).

ACKNOWLEDGEMENTS (10 PT)

*Optional Author thanks.... In most cases, sponsor and financial support acknowledgments.

CREDIT AUTHORSHIP CONTRIBUTION STATEMENT (10 PT)

Author1: Conceptualization, Methodology, Software, Project administration. **Author2**: Software, Writting – original draft. **Author3**: Writing – review & editing. **Author4**: Validation**. Author5**: Supervision.

DECLARATION OF COMPETING INTERESTS (10 PT)

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

DATA AVAILABILITY (10 PT)

Data will be made available on request.

REFERENCES (8 PT)

The main references are international journals and proceedings. All references should be to the most pertinent, up-to-date sources **and the minimum of references** are **20 entries** for original research paper. References are written in **IEEE style**. For more complete guide can be accessed at (http://ipmuonline.com/guide/refstyle.pdf). Use of a tool such as **EndNote**, **Mendeley**, or **Zotero** for reference management and formatting, and choose **IEEE style**. Please use a consistent format for references-see examples (8 pt):
