

PERSONALISED SCHOOL PROFILE in ITALY

Erasmus+ teams of 'Personalised Education for Social Activity' from Poland, Finland, Portugal, and Denmark visited Istituto Comprensivo Rignano Incisa, Rignano sull'Arno in Italy on 8th -11th May 2022. The main objective of the meeting was to create the participants' vision of a personalised school profile, effective in providing education (including entrepreneurial one) to students of different needs and abilities. The participants had a closer look at extra-curricular activities that educational institutions may provide in this field. The following specific activities took place in Italy: workshops for students and teachers leading to the personalised school profile creation, workshops on activating teaching methods used in Italian school with activities during which students could share how personalisation/entrepreneurial skills are taught or put in practice. Students played 'You Can Do It!' game, participated in Multi Talent Quest and EDU Fair – out-of-classroom activities involving students in problem solving. Key competences were further developed. Participants exchanged best practice in addressing varied educational needs, entrepreneurial competences and they gained knowledge on social activity in another European country. It was a great chance to make new friends, learn about new cultures. Also, visiting Florence, Pisa and beautiful hill of Tuscany was an unforgettable experience! 😊

Project co-funded by European Union under Erasmus+ Programme

Personalised Education for Social Activity
