

All environments are Earth on crowded with _____.

Ecosystems contain both _____ and _____ - _____ parts.

Describe what Bill Nye was trying to demonstrate by removing some of the blocks in his tower of blocks.

What does the expression “You pick a flower without jiggling a star” say about ecosystems?

In Consider the Following, Bill Nye makes a special request to not spread out our development projects. WHY?

Name at least two species that have gone extinct. (four were shown)

The “best way to wipe out a species” is to change its _____.

In the area where the students were digging out invasive plants, what was on that land originally, before it was a dump?

The largest ecosystem in the world is _____, where 2/3 of all species live.

In conclusion, Bill Nye states that “As more and more species disappear, it’s harder and harder to keep an ecosystem in balance because we don’t know WHAT?

To keep our ecosystem healthy, we must keep our _____.
