OBJECTIVE

To enjoy what I do & help people :)

SKILLS

JavaScript
Python
AWS

EXPERIENCE

LEAD DEVELOPER

September 2023 - February 2025

I worked on creating Discord bots and managing cloud infrastructure with a notable individual. In the past, I have made a seamless integration with [Discord](#) that allowed the client to easily view their earnings on [Shopify](#) & made it easier for customers to purchase their desired product(s).

XERA SOLUTIONS

September 2025 - Present

I currently work on the infrastructure and operational security for Xera Solutions, a company designed to offer exquisite SaaS services. I also worked on a majority of the front-end, which includes the visuals.

FULL STACK DEVELOPER

July 2024 - October 2024

I worked on the frontend and backend for [VaultCord](#), a service/application for the social media platform [Discord](#), which helps customers backup their Discord server & members, ensuring any interrupted operations can be swiftly continued.

AXIS ENTERTAINMENT

January 2024 - July 2024

I was the Lead Programmer for a game studio known as Axis Entertainment. I coordinated game design, programming, and I also coordinated the social media portion of the group. We were working on a game called "Fossil Digging Simulator", which would've been released exclusively to Roblox, featuring partnerships from an extremely large organization with [over 1.5B+ game sessions](#). Due to logistical issues, I stepped away from the project.

DigitalOcean

Azure

Next.js

React.js

TypeScript

Suyu

March 2024 - April 2024

I was formerly a contributor for [Suyu](#), an open-source emulator for the [Nintendo Switch](#). More specifically, I have helped and contributed with the website, adding features such as a “smart” downloader (that uses the user’s “User-Agent” to automatically download the correct binary) & an FAQ. Additionally, I have worked on & created a WIP game compatibility list (for context, some games do not run well with the emulator, so I’m working on creating a process for users to report those specific games so others are aware as well).

EDUCATION

STUDENT - TCC SOUTH

Tarrant County College District

As a Student for TCC, I plan to pursue an Associates in Cybersecurity. After this, I will transfer my credits to University of Texas at Arlington, where I’ll get my bachelor’s degree in Cybersecurity. I have signed up with classes and will start my 1st semester in mid-August!

CLASS OF 2025 - TTHS

Trimble Technical High School

Previously enrolled at Trimble Tech High School & received my Diploma!

I had a 3.1 GPA, and in the past, I have worked directly with District administrators to ensure the operational security of their servers & devices. Specifically, I’ve notified the proper administrators of improper access controls, publicly exposed information, and more. I have stopped doing this due to technical issues. I also served as the Senior Ambassador for the Cybersecurity major, where I answered questions regarding the field, created interactive and fun projects for prospective students, and planned events for the future.

COMP TIA SECURITY+ CERTIFIED

I have obtained a CompTIA Security+ certification, which is a cybersecurity-related certificate that is notorious for being one of the hardest certificates (in the realm of CompTIA) to get due to the very high minimum score (750 minimum). My code is “KNXSRGFZEFVEI352”, and you can validate it at <https://verify.comptia.org>.

VOLUNTEER EXPERIENCE OR LEADERSHIP

SENIOR AMBASSADOR

I was the Senior Ambassador for the Cybersecurity major in my school, where I answered questions regarding the field, created interactive and fun projects for prospective students, and planned events for the future.

SKILLSUSA

In the past, I worked with my high-school teacher for my major on SkillsUSA, which is a set of competitions to prove our skills/competence.

My role in this was to manage and plan events that are fun, yet challenging. In 2024, I placed second in the SkillsUSA District Competition for District 4, and I advanced onto State, where I won 7th place, and in 2025, I once again placed second in the SkillsUSA District, and advanced to state!
