Extra Credit! Wikipedia Assignment: 5 Points

Edit the content of a Wikipedia article and see how long it takes for it to get changed.

To get **5 points** of extra credit, you need to turn in the following:

1. Copy of the **original** Wikipedia article, including **the date** it was printed.
2. Copy of the **changes** you made to it, with **the date** they were made.
3. Copy of the article if and when **your changes were modified by someone else** with the **date** you noticed the changes.
4. A paragraph of your thoughts on this exercise and what you learned from it.

This must be turned in by **Week 10**. If you make changes and they are not modified by anyone else by Week 10, you can still submit the first two parts of the assignment for extra credit.

NOTE: Typing notes in the Discussion tab does not count. You must edit an article, preferably, with something that improves the article.
