

### 13.07.2017 Changelog

All Sheets

- **Fix:** Updated the sheets to the latest database

### 15.01.2017 Changelog

All Sheets

- **Fix:** Updated the sheets to the latest database

### 23.10.2016 Changelog

All Sheets

- **Fix:** Updated the sheets to the latest database

### 15.06.2016 Changelog

Archon

- **Fix:** The CREST link and import method has been changed by CCP so I made the necessary modifications

### 01.05.2016 Changelog

All Sheets

- **Fix:** Updated the sheets to the latest Citadels database
- **Fix:** Modified the initial taxes to be the current max broker/sales fees

Skiffy

- **NEW:** Broker and sales taxes are now customisable

Research

- **Fix:** A LOT has changed due to the new patch :|
- **Fix:** Some dropdown lists were not working in the gdocs version

### 10.04.2016 Changelog

Research Quoter

- **NEW:** Finally manage to fix and totally revamp this tool. Fuck yeah!

### 09.04.2016 Changelog

Archon

- **Improvement:** The sales/day info is now pulled directly from CREST. The link is now more reliable and stable, but slower.

### 03.04.2016 Changelog

Trade Packs

- **Fix:** Updated the sheets to the latest database 117575

### 24.01.2016 Changelog

Archon

- **NEW:** In the shopping list you can now sort using any column you want!

## 24.01.2016 Changelog

### Trade Packs

- **Fix:** Updated the sheets to the latest build

### Skiffy

- **Fix:** Adjusted the volume and reprocess data for Omber according to the newest database

## 01.11.2015 Changelog

### Trade Packs

- **Fix:** Updated the sheets to the latest Vanguard database

### Skiffy

- **Fix:** Adjusted the ore values according to the newest database update

## 16.06.2015 Changelog

### Trade Packs

- **Fix:** Updated the sheets to the latest Carnyx database

## 04.05.2015 Changelog

### Trade Packs

- **Fix:** Updated the sheets to the latest Mozaic database
- **Fix:** Some weird behaviour with the market stock column has been fixed
- **NEW:** As requested Thera system added!

### Skiffy

- **Fix:** Adjusted the ore values according to the newest update

## 25.01.2015 Changelog

- **Fix:** Fixed I minor bubu I did with the sales volume data. It will now work properly. How did that happen? :)

## 25.01.2015 Changelog

### Skiffy

- **NEW:** You can now select the location for which state the ore/ice is in: raw, reprocessed, compressed. This is useful if you for example want to buy it raw in Amarr and sell compressed in Jita

## 22.01.2015 Changelog

Today I present you the following new sheets: Skiffy, the Lotto Manager. For more info please [check the blog post here.](#)

Kestrel, Zealot Pack

- **Improvement:** Both packs have their formulas, database and guide fully reworked. Import errors are a thing of the past!
- **NEW:** The zealot pack has a new smart sort system to let you decide if the data is sorted by profit or profit rate!

## 20.01.2015 Changelog

Archon Pack

- **Fix:** The formula for the volume had a minor flaw that in certain condition lead to erroneous results. It is not fixed
- **Improvement:** Updated to newest database for Proteus

## 04.01.2015 Changelog

Archon Pack

- **Improvement:** Made a **significant improvement** to the spreadsheet. Because google handles importxml poorly these days, sometimes it results in errors. This has now been fixed using Steve's script.
- **Improvement:** **Shopping list** filter will now pull items with no sales history. For this workaround all items with no evemarketdata available will have the value of 0 for daily sales and market stock. It's not ideal but still better than not seeing it at all
- **Improvement:** The two price locations now auto-complete when you start typing. I've changed the color in some cells to better let you know what you should or should not modify. I've also trimmed the database a bit by deleting non-marketable items and wormhole system data.
- **NEW:** Added some notes here and there to better explain use. Comments are the same to the ones found in the guide.

## 16.12.2014 Changelog

Archon Pack

- **NEW OPTIONS:** After receiving request I decided to just go ahead and offer the possibility to select any region/system to check prices on. Totally AWESOME :). As an added bonus I will provide an up to date database containing all of the items categorised so you can pick what you like. Also I've increased the number of formulas to cover 2000 items with the possibility to later add more.
- **New Improvements:** Total rework of the sheets used for calculations and the database. Not worth going into details but it has been as streamlined as much possible and the database has been brought up to date.

- **Optimizations:** Various optimizations have been made to the “Calculations” tab so less formulas will run each time.
- **Fix:** The Archon guide has also been updated

## 27.10.2014 Changelog

### Archon Pack

- **NEW:** New feature has been introduced “Manual Calculation”. Google docs does not allow to disable the annoying auto calculations that basically makes the whole spreadsheet update after you type in a single cell. I have found a workaround and a small drop down list located in cell J1 in the “Calculation” sheet control whether the intensive calculations are automatic or not. Some of the formulas that do not import data and are not cpu intensive are not affected. This is a long awaited feature, I’m glad I finally implemented it as it was hilariously easy
- **Fix:** Shopping list needed a little bit of work so it will still function properly if new rows are manually added in the Calculation Tab
- **Fix:** The guide for the Archon Pack has been rewritten as it wasn’t up to date. Things are explained more clearly and a short troubleshooting section has been introduced. I will add more common encountered issues and workarounds as soon as I notice them
- **Fix:** Heavy optimization to various formulas (especially in the Calculation Tab) to significantly reduce the number of useless recalculations. From now on when the Days of Stock can’t be calculated due to the lack of data, the value of 0 will be shown. This is necessary for the Shopping List to work properly
- **Fix:** Reshuffled the position of the import formulas so it will import the same number of items at once

### Zealot Pack

- **Fix:** Minor optimization to limit the number of calculations the spreadsheet does

### Kestrel Pack

- **Fix:** Minor optimization to limit the number of calculations the spreadsheet does
