## Here's What Others Have To Say...

**William Hector** · University of Oxford

I had a gallon of milk spill in my car and living in a very hot climate, well you can imagine the stench. I have tried everything but nothing worked. My kids refused to drive with me. So then I bought this Breathe Green Charcoal bag and the smell has disappeared overnight. Can't explain it. Not sure how it works. Buy it...trust me....

This really works. I have a hall closet that was full of strong fragrance (from the previous homeowner) that never seemed to air out after about six months of living here. I had tried a fridge and freezer Arm and Hammer baking soda pack, but the fragrance smell would not go away and hit me in the face when I opened the door. I tried leaving the door open all the time, but the smell would not air out. After having the Breathe Green Charcoal Bag in the closet on the shelf for less than a week I can open that closet door without smelling anything. I am very happy with the result.

I have had really bad allergies for years and no matter what I try, I can't seem to get rid of them... until I tried these Breathe Green Charcoal bags. These things are miracles!!! I place a few bags throughout my house and somehow my allergies cleared up. Im SO happy that I decided to get these.

I forgot all about this. Years ago I used them in a house we lived in. YEP it does work.

This worked for me. I will always have one. There is also a refrigerator bag which is great, too.

My bathroom has a really musty smell that I could never get rid of and I can see some mold in the corners as well. I bought these purifier bags not knowing what to expect but it seems to be really working! The musty smell has disappeared and there are no more signs of mold growing. I'm getting a few more to put in other places around my house now.

I'm using this in our RV where hubby, big sheepdog, and I have spent the summer. It has been amazing!!!! Our air stays fresh even if the whole weekend is "rainy-day-dirty-dog" damp. Yay!
