

Slinger Ball Machine Policy

Rhos on Sea Tennis Club are pleased to share with all of its members a recently acquired Slinger Ball Machine. A fantastic ball launcher that all adult members can use in order to develop parts of their game.

The Slinger was kindly donated from one of our members and as a result, its use will be free of charge.

The portable machine can be wheeled anywhere on court.

It can also be placed on its Oscillator to freely rotate left and right, delivering balls to both sides of the court.

The machine comes with:

- 72 balls
- telescopic ball retriever
- remote control
- 5 hours battery life

You can adjust ball speed, frequency of ball feeding, angle of ball delivery. The oscillator does not have any adjustment settings. It simply rotates left and right at a certain preset speed.

The Slinger Bag tennis ball machine works in a very specific way; namely a mechanism inside the machine pulls a tennis ball in between two spinning rotors and shoots the ball out at a certain point.

This means that every ball is ejected with topspin. The higher you set the speed , the more top spin it will have.

All users must follow the Club Rules.

BALL SLINGER : CLUB RULES.

The Slinger can only be used and operated by members over the age of 18 years.

- Members must book the machine out on Clubspark bookings AS WELL as the court.
- The Slinger can only be used on COURT 3.
- The Slinger must not be used when the courts are wet.
- The Slinger must be put back on charge in the Clubhouse.
- All balls must be retrieved and returned into the machine.
- The Slinger cannot be used until the member has had training from another member/coach or in a group session.

The member is also encouraged to watch the video.
