A study looking at eight flu seasons found increased hospitalization for vaccinated versus unvaccinated children

<https://sci-hub.ru/10.2500/aap.2012.33.3513>

A 2018 study found that children who received the influenza vaccine had a 71% higher incidence of non-influenza respiratory infections than unvaccinated.

<https://sci-hub.ru/10.1016/j.vaccine.2018.02.105>

The Cochrane systematic review looked at 75 studies regarding children vaccinations. They found for children over the age of two, efficacy for the live virus vaccine was 33% and the inactivated was 36%. For children under the age of two, the vaccine efficacy was practically zero. There was also no evidence it reduced mortality, hospitalizations, serious complications, or disease transmission.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6491174/>

According to a 2017 study, vaccination for influenza given during pregnancy increases the risk of miscarriage TWOFOLD for the follow 28 days.

Earthly Vaccine shedding guide

https://www.earthley.com/?download_file=269133&order=wc_order_9H8OLIObCyhK7&uid=cc9dee34370ff063b6d11080219ef804b2e941b59e285e1925ddda66dd2daac1&key=8b1114ea-eb0c-4f98-a9e3-75525232b057

Shedding Measles:

Detection of measles vaccine in the throat of a vaccinated child.

<http://www.ncbi.nlm.nih.gov/pubmed/11858860>

Detection of measles virus RNA in urine specimens from vaccine recipients.

<http://www.ncbi.nlm.nih.gov/pubmed/7494055>

Vaccine-associated "wild-type" measles.

<http://www.ncbi.nlm.nih.gov/pubmed/15804301>

Detection of RNA of mumps virus during an outbreak in a population with a high level of measles, mumps, and rubella vaccine coverage.

<http://www.ncbi.nlm.nih.gov/pubmed/18184850>

Detection of Measles Virus RNA in Urine Specimens from Vaccine Recipients

<http://www.ncbi.nlm.nih.gov/pmc/articles/PMC228449/pdf/332485.pdf>

Shedding Flu:

Can people who have gotten the nasal spray flu vaccine spread the vaccine viruses to others? Even the CDC admits it can, although they try to downplay it:

<http://www.cdc.gov/flu/about/qa/nasalspray.htm>

Shedding and immunogenicity of live attenuated influenza vaccine virus in subjects 5-49 years of age.

<http://www.ncbi.nlm.nih.gov/pubmed/18662737>

Shedding of Ann Arbor strain live attenuated influenza vaccine virus in children 6-59 months of age.

<http://www.ncbi.nlm.nih.gov/m/pubmed/21513761/?i=3>

Duration of virus shedding after trivalent intranasal live attenuated influenza vaccination in adults.

<http://www.ncbi.nlm.nih.gov/pubmed/15954490>

Viral shedding patterns of children with influenza B infection.

<http://www.ncbi.nlm.nih.gov/pubmed/512419>

Duration of virus shedding after trivalent intranasal live attenuated influenza vaccination in adults.

<http://www.ncbi.nlm.nih.gov/pubmed/15954490>

Shedding Chicken Pox:

Varicella Zoster Virus DNA at Inoculation Sites and in Saliva After Zostavax Immunization

<http://jid.oxfordjournals.org/content/203/11/1542.full>

Secondary transmission of varicella vaccine virus in a chronic care facility for children.

<http://www.ncbi.nlm.nih.gov/m/pubmed/16769402/>

Transmission of varicella-vaccine virus from a healthy 12-month-old child to his pregnant mother.

<http://www.ncbi.nlm.nih.gov/m/pubmed/9255208/>

Shedding Rotavirus:

Rotavirus vaccines: viral shedding and risk of transmission.

<http://www.ncbi.nlm.nih.gov/pubmed/18922486>

Detection of fecal shedding of rotavirus vaccine in infants following their first dose of pentavalent rotavirus vaccine.

<http://www.ncbi.nlm.nih.gov/pubmed/21477676>

Rotavirus vaccine-derived shedding and viral reassortants.

<http://www.ncbi.nlm.nih.gov/pubmed/23249230>

Shedding Pertussis:

Acellular pertussis vaccination facilitates Bordetella parapertussis infection in a rodent model of bordetellosis.

<http://www.ncbi.nlm.nih.gov/pubmed/20200027>

Acellular pertussis vaccines protect against disease but fail to prevent infection and transmission in a nonhuman primate model.

<http://www.ncbi.nlm.nih.gov/m/pubmed/24277828/>

Asymptomatic carrier, according to the medical dictionary is an individual who serves as host for an infectious agent but who does not show any apparent signs of the illness; may serve as source of infection for others. Children vaccinated with pertussis vaccines are asymptomatic reservoirs for infection

<http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2627963/>
