Updated 11/18/19

**This is a full-day training for intervention specialists, special education administrators and related service providers who are new to administering the Alternate Assessment.**

For 2020, the Alternate Assessment's format has changed. This training will focus on the 2.0 assessment, which will allow most students to test online. Other ways students can take this assessment if they are unable to take the online version will be discussed as well. This training will also provide background of the 1.0 test so that participants have an understanding of the evolution and administration of that assessment.
