The customized acne gel cream is a prescription-strength treatment that helps shed old, dry skin. It's normal to see some dry, red or flaky spots in the beginning. To help with dryness, you can use a moisturizer—but be sure it's free of alcohol, benzoyl peroxide, salicylic acid and other exfoliators that may irritate. When in doubt, start a dialog through our platform to connect with an expert.

Don't expect miracles if your acne is particularly severe. This is a gentle product to use alongside other acne treatments for best results.

My only negative is it is very very highly fragranced. It's exceptionally strong and I wish they made a fragrance free version

it speeds up the time a pimple takes to heal so the pimple ends up getting bigger THEN going away. I have pimple patches that get rid of the pimple without making it bigger and tbh I prefer those.

Life history- joseph is suffering from severe facial acne almost his whole adult life which is causing him a lot of issues including low self esteem, low self confidence, embarrassment, and frustration, he tried numerous online products and seen no progress, Also took advice from a dermatologist and even the radiotherapy, but no improvement. He is tired and thinking that this problem will never go away. He also suffers from high fragranced products because of the nose sensitivity.
