Subject: Jakarta EE 9 - Help needed!

The community has made tremendous progress towards shipping Jakarta EE 9. Our target is to have all individual/component specifications into ballot no later than October 23rd. This gives time for the Platform and Web Profile specifications to go into ballot by November 6th in time to achieve the goal of shipping Jakarta EE 9 by November 20th.

The <insert name of specification here> is close to being ready for ballot but is not quite done, the work remaining is described in the PR - <add link to the PR>.

I would like to invite you to join the Specification Committee call scheduled for Wednesday the 14th at 16:00 UTC, Zoom link - <https://eclipse.zoom.us/j/102354706> (Password: SpecCmte). At that time the committee is at your disposal to assist you and the project in completing the work required to get this specification to ballot.

You are welcome to share this with the project or invite anyone you think can contribute to completing the work needed to ready the specification for ballot.

Thanks to you and everyone who is contributing to the release of this specification.

Thanks ... Paul

Paul Buck
Jakarta EE Specification Committee chair
