Monthly Pulse

- 66 closed issues / 34 new
- 24 merged PRs / 10 proposed

Recent pending pull requests

- [Duplicate address validator by bhouse1](#)
- [Codespell integration by peternewman](#)
- [Read API endpoint info from environment vars by ssipos90](#)

Working toward iD v2.18.0 release

- [Milestone](#)
- Marquee features
 - Full touch and stylus support on tablets
 - Vastly expanded multiselection editing abilities
 - Osmose Q/A layer
 - Better embed behavior in support of Tasking Manager 4
 - [Unbundling of auxiliary data files](#)
- Recent wins
 - [Updated locator overlay](#)
 - [Retina \(@2x\) TMS parameter support](#)
 - [Fix slow performance when drawing long lines](#)
 - [New way Segements spatial query](#)
 - [Autoprefix CSS](#)
 - [Add buttons to toggle the Location, Measurement, and History panels](#)
 - Show edit menu labels for touch interaction
 - Make various elements scale better to small screen sizes
 - [Add Grade Levels field to schools](#)
 - [Add Destination Sign relation preset](#)
- Remaining work
 - [Update walkthrough and help docs for non-mouse interactions](#)

Preview site

- <https://ideditor.netlify.app>
- [Now pulls latest translations upon rebuilding](#)

Looking forward

- [Accessibility, compatibility, and localization initiative](#)
 - [New ACCESSIBILITY.md file](#)

Updates from other iD developers in the call

Questions? Comments?

June 15, 2020

[OSMF request for comment about procedures around iD](#)

[Monthly Pulse](#)

- 70 closed issues / 33 new
- 22 merged PRs / 8 proposed

Started using dependabot to keep dependencies up-to-date

- [About dependabot](#)
- [Enabled in this commit](#)
- [Using chore-dependabot label for PRs](#)

Sister project updates

- Temaki
 - [4.0.0 released](#)
 - Linted SVGs
 - No explicit display sizes
 - [Improved preview site](#)
 - Search bar
 - Icon categories
 - [View site](#)
- [country-coder](#)
 - Enable dependabot and Travis CI
 - Drop node 8 support

Working toward iD v2.18.0 release

- [Milestone](#)
- Marquee features
 - Full touch and stylus support on tablets
 - Vastly expanded multiselection editing abilities
 - Osmose Q/A layer
 - Better embed behavior in support of Tasking Manager 4
 - [Unbundling of auxiliary data files](#)
- Recent wins:
 - Touch interaction improvements
 - [Flash feedback when tapping certain buttons](#)
 - [Fix inability to tap rapidly on iOS 13.4](#)
 - Operation improvements
 - [Disable Straighten for ways that aren't mostly visible](#)
 - [Disable Merge of ways that would cross the OSM node limit](#)

- [Enable Extract for multiselections](#)
- [Enable Disconnect of multiple selected ways from each other](#)
- [Show more details in the Measurement panel for multiselections](#)
- [Trim OSM tag and relation role values to correct character limit](#)
 - Also performing Unicode normalization on strings

Updates from other iD developers in the call

Questions? Comments?

- 71 closed issues / 30 new
- 9 merged PRs / 4 proposed

Working toward 2.18.0 release

- Milestone: <https://github.com/openstreetmap/iD/milestone/19?closed=1>
- Full touch/stylus support: <https://github.com/openstreetmap/iD/issues/5505>
- Edit menu on touchscreens: <https://github.com/openstreetmap/iD/issues/7577>
- Copy and paste in edit menu: <https://github.com/openstreetmap/iD/issues/2508>
- Spacebar to select/deselect: <https://github.com/openstreetmap/iD/issues/3843>
- Osmose Q/A layer: <https://github.com/openstreetmap/iD/pull/7095>
- Tasking manager support

May 4, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 45 closed issues / 22 new
- 7 merged PRs / 5 proposed

v2.17.3 released

- COVID-19 Pandemic Hours field
- Update old branch name references
- Embed improvements for TM4
- Tons of preset improvements, including icons
- Changelog: <https://github.com/openstreetmap/iD/blob/develop/CHANGELOG.md#2173>
- Milestone: <https://github.com/openstreetmap/iD/milestone/17?closed=1>

Upcoming goals

- Fix remaining issues for TM4 embed
 - Smaller bundle size with new build system
 - Offset fixes
- Stabilize and release develop branch (2.18.0?)
- Continue v3 UI...

Apr 6, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 72 closed issues / 23 new
- 9 merged PRs / 1 proposed

v3

- Milestone: <https://github.com/openstreetmap/iD/milestone/15?closed=1>
- Async data
 - Fix loading issue: <https://github.com/openstreetmap/iD/issues/7406>
- Modularization
 - Refactor various components to not require coreContext
- UI
 - Toolbar PR: <https://github.com/openstreetmap/iD/pull/7496>
 - Menu: <https://github.com/openstreetmap/iD/issues/7368>

Mar 23, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 63 closed issues / 22 new
- 10 merged PRs / 2 proposed

Changed branch names

- 2.x -> develop (working branch)
- master -> v3-prototype (frozen)
- All existing pull requests closed
- Beware of breakages

v3 toolbar reimplementation

- <https://github.com/openstreetmap/iD/tree/v3-toolbar>
- PR coming soon
- Also fixes some lingering bugs

Embedding improvements

- Assisting with Tasking Manager integration of iD
- Scope CSS: <https://github.com/openstreetmap/iD/issues/7437>
- Avoid DOM collisions: <https://github.com/openstreetmap/iD/issues/7445>

imagery-index rollback (for now)

- <https://github.com/openstreetmap/iD/pull/7428#issuecomment-601810337>
- Not much to talk about right now

Mar 9, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 55 closed issues / 22 new

- 7 merged PRs / 5 proposed

v3

- Lots of features already implemented!
- Milestone: <https://github.com/openstreetmap/iD/milestone/15?closed=1>

Zoom UI changes

- "Zoom to this" button moved to be with zoom in/out/geolocate buttons
- [Geolocate button nows shows state](#), gives error feedback

Touch device support

- [Switch to pointer events](#)
- [Apple Pencil support](#)
- [IE 11 / Edge gesture support](#)
- [Improved double-tap-to-zoom](#)
- [Single-tap feature selection](#)
- [Add nodes to ways with double tap](#)
- [Enable node dragging](#)
- Improve way drawing experience

New imagery-index repo

- <https://github.com/ideditor/imagery-index>
- Test site: <https://ideditor.github.io/imagery-index/index.html>
- Reduce size by depending on country-coder
- Issue version numbers to enable releases independent of iD versions
- Remove outdated and low-quality sources
- Refactor to streamline developer experience

Spinning out presets

- Still in planning phase

Ongoing

- [New menu](#)
- Toolbar

Feb 24, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 73 closed issues / 28 new
- 11 merged PRs / 8 proposed

v2.17.2 released

- Return of Maxar imagery layers
- Masked access token
- Other features waiting

v3

- Targeting release before or around State of the Map 2020 in Capetown, July
- Starting to focus most development work on v3
- Not planning a v2.18.0 at this time
- Milestone: <https://github.com/openstreetmap/iD/milestone/15?closed=1>

Next release

- Milestone: <https://github.com/openstreetmap/iD/milestone/15?closed=1>
- Osmose Q/A layer: <https://github.com/openstreetmap/iD/pull/7095>
- Field editing in multiselection: <https://github.com/openstreetmap/iD/pull/7306>
- <https://github.com/openstreetmap/iD/issues/4994>
- Menu: <https://github.com/openstreetmap/iD/issues/7368>

Next release

- Milestone: <https://github.com/openstreetmap/iD/milestone/15?closed=1>
- Osmose Q/A layer: <https://github.com/openstreetmap/iD/pull/7095>
- Field editing in multiselection: <https://github.com/openstreetmap/iD/pull/7306>
- <https://github.com/openstreetmap/iD/issues/4994>

Upcoming events

- Quincy in Seattle / Bay Area

Jan 27, 2020

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 87 closed issues / 21 new
- 10 merged PRs / 7 proposed

2.17.1 released

- Blog post: <https://ideditor.blog/2020/01/17/id-v2-17-1-released>
- Changelog: <https://github.com/openstreetmap/iD/blob/2.x/CHANGELOG.md#2171>

- Milestone: <https://github.com/openstreetmap/iD/milestone/14?closed=1>
- Node 8 dropped

Next release

- Improvements to development architecture
 - Don't rollup data when building
 - Move slow IE/Phantom compatible build into separate "legacy build" process
 - Bundle iD modules into separate packages
- Working toward v3 UI
 - Inspecting / tag editing for multiple selected features

2.17.0 released on Dec. 23

- Blog post: <https://ideditor.blog/2019/12/30/id-v2-17-0-released>
- Changelog: <https://github.com/openstreetmap/iD/blob/master/CHANGELOG.md#2170>
- Milestone: <https://github.com/openstreetmap/iD/milestone/13?closed=1>

2.17.1 patch coming soon

- Changelog: <https://github.com/openstreetmap/iD/blob/2.x/CHANGELOG.md#2171>
- Milestone: <https://github.com/openstreetmap/iD/milestone/14?closed=1>
- Highlights:
 - [Drag-and-drop semicolon-separated field values](#)
 - [Validation-breaking bug fix](#)

Ongoing/Upcoming

- Osmose layer by SilentSpike: <https://github.com/openstreetmap/iD/pull/7095>
- Tasking manager integration
- iD v3 UI

Dec. 16, 2019

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 66 closed issues / 17 new
- 6 merged PRs / 7 proposed
 - Osmose layer by SilentSpike: <https://github.com/openstreetmap/iD/pull/7095>

Upcoming Release: 2.17.0

- <https://github.com/openstreetmap/iD/milestone/13?closed=1>
- > 100 issues and pull requests
- Pulling in many smaller changes from v3 branch
 - [Highlight selected relation members in map](#)
 - [Search all downloaded features in search, not just visible](#)
 - [View and edit tags of selected features at any zoom level](#)
 - [Enable squaring multiple features at once](#)
 - [Center multiple selected features at once](#)
 - [Make top toolbar scrollable when overflowing](#)
 - Generalize tooltip UI into a popover UI
 - [Use keyboard styling for keyboard shortcuts in tooltips](#)
- Remaining to-do:
 - Privacy Policy: <https://github.com/openstreetmap/iD/issues/7040>
- Previously discussed:
 - [country-coder integration](#)
 - [Add bridge/tunnel fixes for crossing ways](#)
 - *Multipolygon niceties*
 - [Validation warning for unclosed multipolygon rings](#)
 - [Automatically convert trivial multipolygon back to closed way when merging](#)
 - [Fix incomplete multipolygon rendering](#)
 - [New icons!](#)

Ongoing

- iD v3
 - Milestone: <https://github.com/openstreetmap/iD/milestone/6?closed=1>
 - Live preview: <http://preview.ideditor.com/master>
 - Tweet w/ demo: <https://twitter.com/quincylvania/status/1153772137448189953>
- [Task Manager Integration](#)
 - Google Summer of Code work by Thomas Hervey
 - Quincy is working to get it merged

Dec. 2, 2019

News

- [iD/OSM mappers profiled in Washington Post](#)
- [OSMF board candidates respond to questions](#)

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 63 closed issues / 17 new
- 4 merged PRs / 7 proposed

Upcoming Release: 2.16.1 (?)

- <https://github.com/openstreetmap/iD/milestone/13?closed=1>
- [country-coder integration](#)
- [Add bridge/tunnel fixes for crossing ways](#)
- Multipolygon niceties
 - [Validation warning for unclosed multipolygon rings](#)
 - [Automatically convert trivial multipolygon back to closed way when merging](#)
 - [Fix incomplete multipolygon rendering](#)
- [New icons!](#)

Dependency changes

- country-coder and temaki are now packaged under the @ideditor namespace

Nov. 18, 2019

<https://ideditor.blog>

Nov. 4, 2019

Monthly Pulse

- <https://github.com/openstreetmap/iD/pulse/monthly>
- 68 closed issues / 25 new
- 10 merged PRs / 3 proposed

iD 2.16.0 release

- <https://github.com/openstreetmap/iD/blob/master/CHANGELOG.md#2160>
- Announcement tweet: <https://twitter.com/quincylvania/status/1189524992641392640>
- Mapillary detected data layer demo:
<https://twitter.com/iamnunocaldeira/status/1191001898113028101>

New dependency project: country-coder

- <https://github.com/ideditor/country-coder>
- Client-side solution to get country codes and basic regional data for geographic points
- Available as a separate node package for any project to use
- Replaces some calls to nominatim in iD:
 - Address formats
 - Region-restricted presets and NSI brands
 - Multilingual name field language suggestions
- Replaces some data
 - Drive left: <https://github.com/openstreetmap/iD/blob/master/data/drive-left.json>
 - MPH: <https://github.com/openstreetmap/iD/blob/master/data/mph.json>

- OSM community index country features
- Enables new functionality
 - Region-specific validation warnings
 - Telephone country code suggestion

New code contributors

- CarycaKatarzyna: <https://github.com/openstreetmap/iD/pull/6993>
- hackily: <https://github.com/openstreetmap/iD/pull/6979>

Recent events

FLOSSK/SOTM Southeast Europe

- <https://sotmsee.org>
- Oct 25-27 in Kosovo
- Quincy gave a talk and iD workshop

Quincy at ITC

- <https://www.itc.nl>
- Presented iD broadly and met with GIS faculty and students

Next priorities

1. Endpoints/hooks for Task Manager 4 embedding of iD
 - <https://github.com/hotosm/tasking-manager/issues/1909>
2. iD v3 UI completion, testing, and release process

Oct. 7, 2019

Monthly Pulse

- 68 closed issues / 26 new
- 11 merged PRs / 6 proposed

Upcoming Release: 2.16.0

- <https://github.com/openstreetmap/iD/milestone/12?closed=1>
- [Mapillary detected Map Features overlay](#)
- [Visual diffing](#)
- [Resolved issue counts and accurate warning counts](#)
- [Reversing directional nodes](#)
- Warnings for points as vertices, vertices as points, features with wrong names

Past Events

State of the Map US

- iD Talk posted! <https://2019.stateofthemap.us/program/sat/id-v3.html>

SotM Heidelberg

- Quincy represented iD
- 30-minute birds of a feather session

Upcoming Events

FLOSSK/SOTM Southeast Europe

- <https://sotmsee.org>
- Oct 25-27 in Kosovo
- Quincy giving a talk and iD workshop

Quincy visiting ITC

- <https://www.itc.nl>
- Talk about iD

August 26, 2019

Monthly Pulse

- 99 closed issues / 31 new
- 6 merged PRs / 3 proposed

Releases

- 2.15.5 (planned for today, 8/26)
 - <https://github.com/openstreetmap/iD/blob/master/CHANGELOG.md#2155>
 - <https://github.com/openstreetmap/iD/milestone/11?closed=1>
 - Drop Node 6 support
 - CLDR language list for Multilingual Name field
 - Populate the default preset list with items from the “presets” parameter
 - Accept relation IDs in “choose a parent relation” dropdown
 - Search terms for the “Add field” dropdown
 - Fix Mapillary and Bing Streetside viewer resize bug
 - Power tower/pole icons
 - The usual bug fixes, usability improvements, validation work, and preset updates

iD v3

- Power Line mapping:
<https://github.com/openstreetmap/iD/issues/5701#issuecomment-523685192>
- Toolbar item toggling:
<https://github.com/openstreetmap/iD/issues/6717#issuecomment-520981258>
- Remove geometry selection step from preset browser:
<https://github.com/openstreetmap/iD/issues/6760#issuecomment-521736050>

- 2.15.4
 - Minor bug fixes and preset updates

iD v3

- Generalization: <https://github.com/ideditor/id-sdk>
- Edit tags of multiple selected features:
<https://github.com/openstreetmap/iD/issues/1761>

July 15, 2019

Monthly Pulse

- 77 closed issues / 36 new
- 6 merged PRs / 4 proposed

Releases

- <https://github.com/openstreetmap/iD/blob/master/CHANGELOG.md>
- 2.15.3
 - Preset restrictions on launch via `presets` URL parameter
 - Deprecate Digital Globe imagery
- 2.15.2
 - Revert some contention tagging and validation features
 - Preset, validation, and bug fixes

iD v3

- Progress / Demo
 - <http://preview.ideditor.com/master>
 - Assistant
 - Contextual toolbar
 - Preset recommendations
- iD generalization
 - Use iD for other geographic databases without forking
 - Use iD components in other apps
 - Separate OSM tagging from core development
