

On a piece of paper make two columns. Label them physical property and chemical property. Cut the following strips and glue them under the correct category

Blue color	density	flammability (burns)	solubility (dissolves)	odor
reacts with acid		supports combustion	sour taste	melting point
reacts with water		hardness	boiling point	luster
				reacts with air

On a piece of paper make two columns. Label them physical property and chemical property. Cut the following strips and glue them under the correct category

Blue color	density	flammability (burns)	solubility (dissolves)	odor
reacts with acid		supports combustion	sour taste	melting point
reacts with water		hardness	boiling point	luster
				reacts with air
