

The Cycle of Change

Prochaska & DiClemente

- **Precontemplation:** A logical starting point for the model, where there is no intention of changing behavior; the person may be unaware that a problem exists
- **Contemplation:** The person becomes aware that there is a problem, but has made no commitment to change
- **Preparation:** The person is intent on taking action to correct the problem; usually requires buy-in from the client (i.e. the client is convinced that the change is good) and increased self-efficacy (i.e. the client believes s/he can make change)
- **Action:** The person is in active modification of behavior
- **Maintenance:** Sustained change occurs and new behavior(s) replaces old ones. Per this model, this stage is also transitional
- **Relapse:** The person falls back into old patterns of behavior
- **Upward Spiral:** Each time a person goes through the cycle, they learn from each relapse and (hopefully) grow stronger so that relapse is shorter or less devastating.
