

(Header) You must know this by now

Hi

If you've ever wanted to have your own authority blog you must know this by now

The sheer amount of content required is daunting.

I tried to get this from Upwork and heck they wanted to charge me \$10,000 for it.

But now things are about to change

(see it in action here)

A new software has just launched which automates the entire process

It sucks out viral videos, posts them onto your blog, transcribes them, and even translates them into **103 languages**.

This will give you an immediate authority blog, chock full of viral stunning looking content, ready to suck in traffic and spew out commissions.

What's more - you'll get a tonne of traffic from the 95% of the world's population which doesn't speak English as their first language.

This traffic is huge....and a lot less competitive

This is a software that sucks out viral videos and then populate them onto your blog

- It transcribes the content from the video and creates SEO optimised posts that will drive traffic straight away
- It translates those post to 103 languages which means that you'll be getting traffic from the 95% of the world that doesn't speak English as a first language
- All posts have the best tags already included which means that you don't need to do any keyword research - this is literally plug and play stuff
- If you've ever wanted to get into the content curation game and make money selling affiliate offers or adsense, this is the easiest way there is to get started.

Pretty cool right?

Most people create content in English only and so miss out out on the remaining 95% of the world that doesn't speak English as their first language
