W: <http://www.davidemontersino.com>

Sex **M** | Date of Birth **30/7/1983** | Nationality **Italian**

Objective

I'm a **software designer and developer** with an **entrepreneurial mindset**. I always look for opportunities to improve my skills and to work with exciting people on awesome projects.

Summary

Senior full stack developer. I love Javascript but I am also proficient in **LAMP** and **Microsoft Stack**.

Passionate about web standards; proficient with **React**, **Node JS**, **Html5**, **css (sass, less)**, **ES6**, **MongoDb**, **C#**, **PHP**, **T-Sql**, **MySql**.

Familiar with **AWS** and cloud technology.

Experience

Weborama, Senior software engineer

Amsterdam, Netherland — March 2015- current

<https://www.weborama.nl>

<https://www.weborama.com>

My main focus in this company is to modernize, develop and maintain infrastructure-critical javascript libraries that run billion of ad impressions per month across a wide range of devices.

I also am developing a web tool based on React and loopback to allow creative agencies to easily create and edit rich media advertisement in-browser.

Accomplishments:

- Modernized the project's old codebase and enabled a more structured workflow in the project
- Automated testing of front-end performances (i.e. selenium)
- Developed of node.js microservices for internal use
- I have been training other developers in modern and agile javascript development (workflows, c.i., version control, design patterns)

iCoolhunt Spa, Software Architect

Torino, Italy — July 2014 - March 2015

<http://www.icoolhunt.com>

<http://www.nextatlas.com>

A growing startup working with **big data** to help companies spot and forecast new trends. Worked using **PHP**, **Python**, **MongoDB**, **Angularjs**, **d3js**.

- Maintained and added new features to www.nextatlas.com (both in the PHP/Python backend and in the AngularJs frontend)
- Introduced a structured process and development best practises in the team (**git** version control, **continuous integration**, **grunt/PHPUnit**)

- testing)
- In-sourced software that was being outsourced (AngularJs web application)

NTS Labdicicento S.r.l, Web Developer

Torino, Italy — 2010 - 2014

<http://www.ntsweb.it/>

I designed, developed and maintained a number of web-based projects, both independently or in team. Main server side technologies were Microsoft stack (**ASP.NET MVC / C#, Sql Server**)

Accomplishments

- 2014 - Developed a console for **Fiat Chrysler Automobiles** App to be used worldwide for the collection of leads.
- 2013 - Lead designer / developer for **Abarth's car configurator** in one of the first **html5** car configurators.
- Designed and developed web applications and websites for **Samsung, Vodafone, Fiat Abarth, Ernst & Young, Banca Generali** and others

Futura NT S.r.l, Web Developer

Futura NT S.r.l. – Torino, Italy 2008 - 2010

<http://www.futura-nt.it/>

Accomplishments

- Designed and developed CMS and website for the news site **volleyball.it**
- Maintained and added functionalities to a **ASP.NET** application for **Praxair**.
- Development and maintenance of a number of smaller projects
- Integration of revision control (**svn**), issue tracking (**Mantis**) and document management (**dokuwiki**)

Education

Set Squared - University of Bath

September 2014 - Bath Entrepreneurship programme

- I was awarded this intensive one-week course as one of the **best 20 students** in **Talenti per l'Impresa**, a one semester long entrepreneurship seminar organized by **Fondazione CRT**.

Politecnico di Torino

First degree graduate in Computer Science and Engineering

- Programming techniques and languages, mathematical analysis, physics, linear programming, Operating systems, electronics, networking, databases.

Language Skills

Italian Mother tongue

English Fluent

Spanish Intermediate

Dutch Beginner (A2)
