

Pokémon MASTER Fire RED

By Master Poucine

Introduction : Hi It's Your Boy Master Poucine I've been playing and Nuzlocking Romhacks For over 2 years on My Youtube Channel And I feel In love with it. I've always dreamt of creating my own RomHack and today I present to you My own creation Pokémon Kanto Fire RED.

What is Kanto Fire RED, it's a GBA RomHack of FireRED with only the first 151 pokémon all catchable The original pokémon From the first Released Game by Game Freak.

But I was not fully satisfied when I was playing the game. The gym leaders were too easy, the movesets not crazy and even the learnset and the base stats. So i decided to change the typing, the abilities, add an easy EV training in the first pokemart (each vitamins give you 40 Ev and it's capped to 252) also you can buy rare candies for 1 poké same for repels and vitamins no need to grind for hours and all the tms are available from the beginning of the game at the pokemon centers.

Oh wait, that's too easy... No with the teams that i Build for gym leaders rival and Giovanni you will be surprised by the difficulty of the game. I don't recommend Nuzlocking the game for your first playthrough, it's almost impossible (if you want to try to nuzlocke it anyway, here are the level caps).
