

Binder Project Ideas

I'm always being asked to come up with more binder projects for the woodshop so here is your chance to help me do that very thing. Remember, I don't have an unlimited budget for wood so be sensitive to the cost by creating a Materials List and an estimated cost for each project.

REQUIREMENTS - See [Rubric](#).

1. Create Binder Project in Google Slides.
2. Use an appropriate theme/background for the project, but make sure that all text is easy to read and not too color heavy or you'll use up my colored ink when I print to put in binders...see my samples below.
3. Take your own pictures (email them to yourself and put in Google Drive).
4. Title slide needs to include the name of the Project, most recent revision date, your name, and the estimated skill level (beginner, intermediate, advanced). Here are a few samples of my current binder projects: [Beginner](#), [Intermediate](#), [Advanced](#)
5. Steps must be numbered.
6. No more than 16 slides please (title and QR code slides don't count against you)
7. Binder projects may not cost more than \$100 to make (Ideal Budget: Level 1 = \$20, Level 2 = \$30, and Level 3 = \$50).
8. May include short video clips as URL's. Use tinyurl.com to create a shorter URL for posting in your slideshow.

SAMPLE IDEAS

- Dollhouse
- Child's toy (must have multiple parts)
- Chair
- Table
- Planter bench
- Side table
- Bookshelf
- Coatrack
- Shoerack
