

DEARNESS ALLOWANCE TABLE FROM 1.1.2006

DA CALCULATION SHEET

We are proud to be the first to formulate the DA Table.

We are aware of the fact that a number of you are very keen on learning how to calculate the Dearness Allowance. Hence, we created this table. At a stage, we ourselves were surprised by the response that it had received.

Let us see, in detail, how DA is calculated. The calculations are very easy.

First is the month. Then comes the CPI (IW) Base Year 2001=100 and the relevant data. In the next column, you have the sum total of all the 12 months, i.e., the total of the declared AIPCIN numbers for the past 12 months. Next comes the division of the sum total by 12.

The next step is the most crucial one. You will have to find out by how much it exceeds 115.76. You will have to calculate the excess as percentage of 115.76.

(12 Monthly Average) - 115.76

----- X 100 = Percentage increase in prices (ignore decimals)
115.76

The table has been created to easily understand the formula...

Month / Year	B.Y. 2001=100	Total of 12 Months	12 Months Average	% Increase over 115.763	App. DA	DA %
