Nathan, 22 years old, lives in Sydney with his girlfriend. He currently works at a restaurant in the afternoons.

Current situation

Nathan is a fitness fanatic. He trains in the gym everyday, goes on long runs and plays tennis three times a week. He is constantly feeling sore because of his workouts. He wakes up and his legs would be sore. Sitting on the toilet is painful. This makes him frustrated as he is always sore in one place or another. Everyday he feels drained of energy, tired and sluggish.

Roadblocks

He has tried taking ibuprofen which only numbs the pain temporarily. Seeing a physio every week is becoming expensive. He doesn't know where to start to overcome his pain.

Dream state

He will recover quickly from his workouts. He will no longer feel sluggish or tired everyday. It will require minimal effort to recover from his muscle soreness.

Solution

Something quick and convenient. Something that doesn't require him to spend tons of money every week. Something he can do from the comfort of his own home and is effective in reducing muscle soreness.

The Product:

Massage Gun.

- 4 power levels
- Different attachments included
- Low noise
- Portable and convenient

When eliminating muscle soreness at home beats seeing a physiotherapist.

How would you feel if you DIDN'T need to see a physiotherapist to repair your dismantled body?

That might sound out of the question right now, but it can be done.

By using the power of percussive therapy, you can mimic the magic hands of a physiotherapist leading your muscles from anywhere.

Your muscles CANNOT wait for your 11:30 appointment.

They need relief right now.

Click the link to leverage percussive therapy to relieve your muscle pain.

How to walk again after a workout.

Imagine waking up in a paralyzed body feeling as if gravity is trying to pull you into the ground.

Imagine how long it takes to lower yourself onto the toilet because your legs are shaking like jelly.

Imagine needing to hold onto a support as your pulsing calves are about to give out with every step you take.

You can easily prevent this by utilizing the power of a rapid pulsating percussion tool.

It is amazing how a small motor is able to dig deep to stimulate muscle repair.
